

Jumbo Size Sunshade

User Guide and Sizing Chart

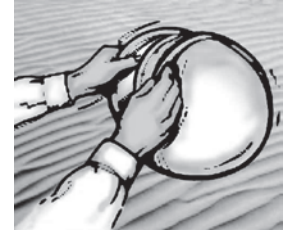

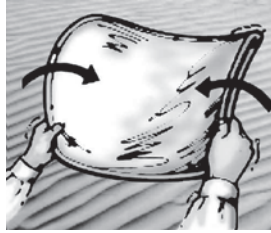

The sunshade in this package is a **Jumbo (J)** size and fits vehicle models listed below. If you do not find your model here, please look on the **Standard (S)** size sunshade package. As added assurance, use the following method to help you select the proper size. Measure the height of exposed glass of your windshield at the middle. If 30"-34" use a jumbo size. If less than 30" use Standard size. If more than 34" you have an extra-large windshield that requires a super jumbo or custom size that is not available at this time.

Note: Methods is not 100% accurate due to other variables than glass size, and is only for approximate guidance.

Installation:

Place sunshade in front of windshield between glass and rearview mirror - silver side facing out. Pull sunvisor down to hold sunshade in place.

To Fold:

1. With one shade panel placed on top of the other, hold the panels in front of you as shown.

2. Fold each side of the panels towards each other by bringing both hands together, one hand above the other. Three loops will form automatically.

3. Grasp the collapsed shade panels, adjust the three loops to about equal size.

For easy How to fold video visit <http://bit.ly/SunshadeFold>

NOTE: 95% of pre - 1985 cars and trucks use a Standard size shade
