Installation Steps by Fog Light Type

1. Remove the headlight dust cover.
2. Pull out the mounting ring from the Fog Light.
3. Insert the mounting ring into the socket and fix it with the metal spring.
4. Insert the Fog Light body into the socket.
5. Rotate clockwise to secure.
6. Turn on the Fog Light, and make sure it is lighted up correctly.
7. Put the dust cover back.
8. Turn on the Fog Light, and make sure it is lighted up correctly.
9. Perform Step 1 and 2 only on LM57848 (H4) and LM57862 (H7).

Warnings:
- Caution! If you get an error code, or lights are flickering, use a decoder to complete the installation. Decoder is sold separately.
- Considering the high intensity of light, DO NOT stare at the light when it is switched on.
- The surface of the LED will reach very high temperature when it is turned on. DO NOT touch the surface directly to avoid severe burns.
- Try to not block or obstruct air flow of cooling fan.
- Before installing, please make sure the Fog Lights are free from third party dust covers as a replacement.
- Some vehicles require the engine to be started for operation of all beams.
- Check your state or provincial laws before installing.
- Check your state or provincial laws before installing.
