Please refer to the warranty card at the rear of this manual for information regarding your product's parts and labour warranty, or visit online at:

- www.residentia.group
- www.applico.co.nz
- www.inalto.house

Both Residentia Group & Applico are customer obsessed and our Support Teams are there to ensure you get the most out of your appliance. Should you want to learn more about recommended usage, the various features of your appliance, and importantly taking care of the unit when cleaning, our Support Teams are here to help.

Telephone Contacts:

- AU: 1300 11 4357
- NZ: 0800 763 448

It is important that you read through the following use and care manual thoroughly to familiarise yourself with the installation and operation requirements of your appliance to ensure optimum performance.

Again, thank you for choosing an InAlto appliance and we look forward to being of service to you.

SCAN ME

Scan to Register your InAlto Appliance or go to:

- AU: www.inalto.house/registration
- NZ: www.inalto.house/nz/registration

By registering your product, you will receive advanced support, stay updated with the latest from InAlto and find out about new products and promotions.

Safety Instructions

- Never store inflammable or explosive items and strong corrosive acids or alkalis in the appliance.
- This is a household appliance, which is produced in accordance with the national standard. It is intended for food storage only, not for storage of blood, medicine and biological products.
- To prevent risk of fire, keep the appliance away from petrol or any other inflammables.
- To prevent risk of electromagnetic interference or other accidents, do not place a microwave oven on top of the refrigerator or use any electric appliance inside the freezer.
- Do not allow children to play with or near the appliance.
- The internal surface of freezer compartment is very cold when the appliance is running. Do not touch the surface especially when hands are wet.
- Do not splash water onto the appliance. Keep it away from places of high humidity that may have adverse effect on the electric insulation performance.
- This appliance is designed to be used in ambient temperatures between 10 and 32°C. Use outside of this range may cause the appliance to fail.

Customer Care

InAlto recommends the use of original spare parts. When contacting our customer service team on 1300 11 4357, please ensure that you have the following information at hand (which can be found on your appliances' rating plate).

- Model Number
- Serial Number

Before First Use

You must allow the freezer to settle for at least twenty four hours prior to switching the power on.

It is recommended that you clean the interior of the appliance prior to first use, using a solution of bicarbonate of soda and warm water and then thoroughly drying the interior.

The freezer may have an odour to it at first use. This will disappear as the appliance cools.

Please note:

The appliance will start on temperature setting 3 and work continuously until it comes down to the correct temperature.

If the appliance is switched off, you should allow five minutes before switching it on again to prevent unnecessary damage to the compressor.

Never store inflammable or explosive items and strong corrosive acids or alkalis in the appliance.

This freezer cools your food by making the inside back of the cavity cold. It is normal for frost to build up on this surface; it then dissipates and drains through a small drain at the bottom, where it evaporates harmlessly. The presence of some frosting is not a malfunction of the freezer.

Usage Tips

- The freezer compartments are designed to store only frozen food.
- Never put hot or warm foods in the freezer, allow them to cool fully before putting them into the freezer.
- Follow the instructions on the food packaging for storage of frozen food. If no information is provided, foods should not be stored for more than three months after the purchase date.
- Store food in small packages (ideally less than 2.5kg). This reduces the freezing time and improves the quality of the food after thawing.
- Wrap food before putting into the freezer. To stop the wrapping sticking together, ensure it is dry.
- Label the food before freezing with information including type of food and dates of storage and expiry.
- Once food is thawed, it must not be refrozen unless it has been completely cooked. Only defrost as much food as is required to prevent wastage.
- Bottled or canned drinks should not be stored in the freezer compartment as they could explode.
- Check the rating plate to confirm the maximum amount of fresh food that can be frozen within a 24 hour period.

Your Integrated Freezer

The freezer is for short-mid term food storage. Although low temperatures can be maintained, extended periods of food storage is not recommended.

As the cold air circulates within the freezer, the temperature can vary between the different sections. As such, foods should be stored in different sections according to type and storage term. The bottom sections are the coldest parts of the

freezer.

The top two sections have raisable flaps that stay open for ease of loading and unloading. The remaining 5 sections are drawers.

The 6th setting on the control panel, represented by the snowflake (Fig. 2), is a super freeze function. This should be used when freezing large quantities of food all at once. Activate this function 2 or 3 hours before introducing the food and do not leave it to run for more than necessary. Leaving it to run for longer will place unnecessary strain on the cooling system. The function will automatically deactivate after approximately 24 hours.

Using Your Freezer

A. Freezer temperature adjustment sensor

This button is used to adjust the temperature within the freezer. Press this sensor once to activate adjustment, and then as many times as necessary until the desired level is selected. The settings range from 1 to super freeze (snowflake) with 1 being the warmest and super freeze being the coldest.

Please note: Where possible, avoid having the temperature setting on 5 or super freeze (snowflake) all of the time. This will help to alleviate strain on the compressor and system.

B. Freezer temperature setting display

This display will illuminate the current temperature setting. Adjusting the temperature will cycle through this display.

Please note: You do not use numbers 1 to 5 or the snowflake to change the temperature. Instead, use the freezer temperature adjustment sensor (A).

C. Power button

Use this sensor to switch the appliance on and off (standby mode). The sensor will be illuminated when the appliance is off.

Defrosting

The freezer is self-defrosting. Any water created will run out through the channel at the back of the freezer, unless the drain hole is blocked. The defrosted water is collected in the evaporating tray at the back of the appliance and dissipated by evaporation (when the compressor gets hot).

Please note: If you are regularly finding pools of water in the freezer, frost build-ups, or you notice that the compressor is always running, then it is likely that the door is not sealing properly. This could be due to a defective door seal or an incorrectly fitted, or overly heavy, decor door. For more information see the troubleshooting section on ice on pages 24-25.

Installation

This appliance must never be installed close to heat sources, e.g. heating elements or cookers, nor in damp places.

Seek the help of another individual, or two, when installing this appliance. This appliance may have sharp edges. Wear adequate PPE for the task and environment.

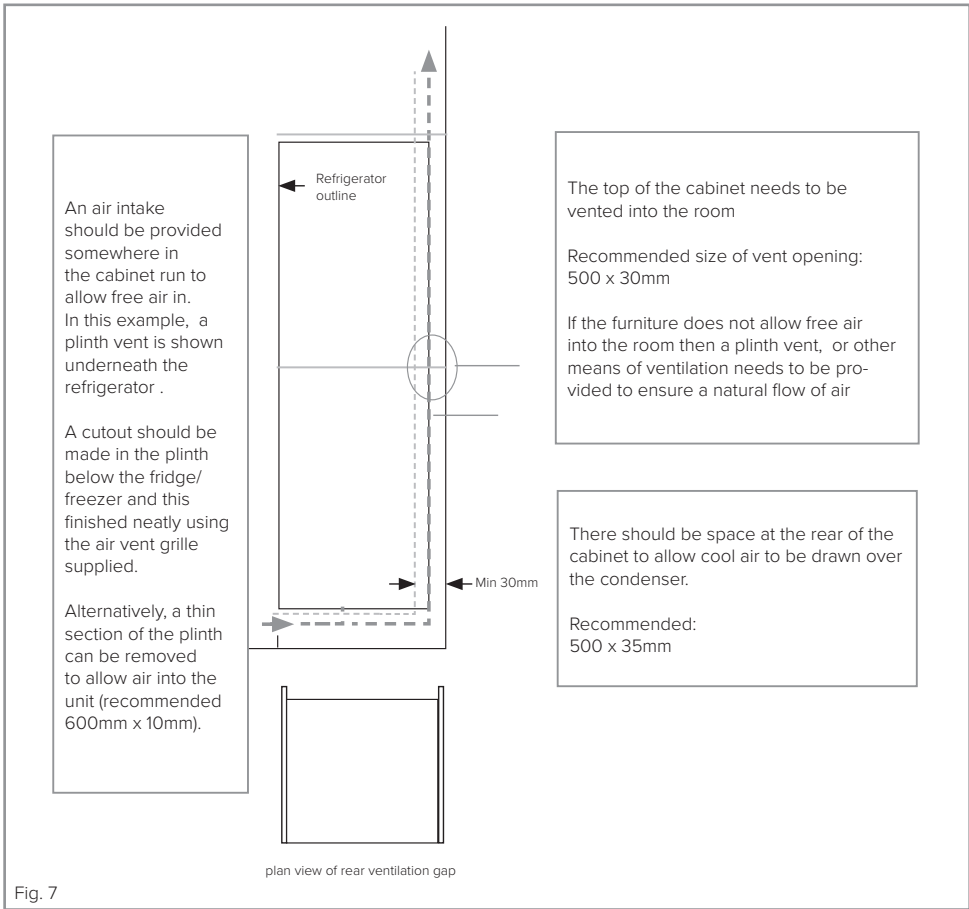

- To ensure the appliance is level, you should use the height adjustable feet at the front of the appliance.
- The cooling system at the rear of the appliance must not touch the rear wall. The greater the gap, the better.
- The appliance must be installed with adequate ventilation. Ensure that there is clearance above the appliance to allow air to escape and that there is space between the rear of the appliance and the wall.

Ventilation

The main consideration when installing any refrigeration unit into a fitted kitchen is ventilation. The heat removed from the cooling compartment needs to be dissipated into the atmosphere. Incorrect ventilation can lead to premature compressor failure, excessive power consumption, total system failure and may invalidate the warranty provided with the appliance. For products intended to be installed into a tall housing unit, the following requirements need to be met:

Installation Instructions (Continued)

The open channel at the rear is clearly shown. For the correct operation of the appliance it is important that the top of the housing unit is not blocked off. A channel depth of 40-50mm is normal with most units.

A ventilation hole is required in the plinth of the unit; this allows air to be drawn over the compressor & heat exchange. A decorative grille is supplied with the appliance to finish this vent neatly. Alternatively the required air flow can be achieved by removal of a thin section of plinth (recommended 600mm x 10mm minimum).

As a rule, the more air that can get in and out, the better and more efficie

Installation into the cabinet

To ensure the appliance is level, you should use the height adjustable feet at the front of the appliance. The ventilation system at the bottom of the appliance must not be blocked

Push the appliance carefully into the cavity, make sure the appliance is in the central position of the cavity. Following the steps on the next page to fit the decor door, ensuring the door can be opened and closed properly then tighten the screws on the top, hinge side and the bottom.

Installation Instructions (Continued)

Mounting the fascia doors

Fig. 9 - Fitting the decor door bracket

Remove the white decorative cover (Fig. 8) by lifting it upwards.

Obtain the below measurements:

Dimension B = Measure from the underside surface of kitchen unit to the bottom of fixing bracket.

Dimension C = Measure from the underside surface of kitchen unit to the top of next unit door.

Unscrew and remove the nuts and washers from the top of the appliance door to remove the bracket.

Fig. 10 - Fitting the decor door bracket

Subtract C from B and put the fixing bracket (2) in place using this measurement for vertical position and place to the centre for horizontal position. Secure the fixing bracket (2) using screws(1).

Fig. 11 - Fitting the decor door

Place the decor door onto the appliance door by inserting adjustment bolts into the slots on the fixing bracket.

Locate the washers and screw the nuts onto the adjustment bolts.

Fig. 12 - Aligning the decor door

Close the door and check the alignment with the other unit doors. Adjust the decor door by screwing or unscrewing the adjustment bolts for vertical adjustment and by the help of the slots on the fixing bracket for other directions. Lock the screws into place as shown in Fig. 12.

Fitting the decor door base fixings

With the appliance door open, locate the metal decor door base fixing brackets and screw the fixings to the decor door. You may need to remove and re-fit these brackets depending upon the decor door used.

Installation Instructions (Continued)

Fitting the decorative cover

Re-fit the decorative cover, that you removed in the first step, on to the decor door fixing bracket. Check that the whole door assembly operates smoothly and that the door seal of the refrigerator is still creating a seal.

Important: After completing the installation, check that the appliance is secured within the unit and that the door(s) close and open properly. If there is no resistance from the door seals when opening the doors, then it is probable that the appliance and/or decor doors are not fitted properly.

THIS PAGE IS INTENTIONALLY LEFT BLANK

Reversing the Door

We recommend you seek the help of another individual to support the doors whilst performing this operation.

1. Carefully prise off the white cover caps for the side that you wish to switch the hinges to
2. With the door closed remove the hinge caps and the screws from the top hinge attaching the hinge to the door, support the door whilst doing this, then remove the screws from the lower hinge
3. Support the door at the bottom and open the hinges away from the appliance door. Carefully lift the appliance door away, ensuring not to damage the hinges or the door. Place the door somewhere safe where it will not cause or receive damage
4. Repeat steps 1 to 3 for the lower door if necessary
5. With the top hinge open, remove the screws that fix the hinge to the appliance cabinet, do the same with the lower hinge.
6. Flip the top hinge 180 degrees and reattach the the hinge on the diagonally opposite corner of the appliance cabinet as shown in fig. 13
7. Swap the previous bottom hinge to the opposite side at the top. Refit the upper door and the “new” top hinge and fix securely to the appliance. Repeat this process for the bottom door if necessary
8. Fit the central cover caps and top hinge cover pieces in place to complete the process.

Reversing the Door (Continued)

We recommend you seek the help of another individual to support the doors whilst performing this operation. Always wear adequate PPE (Personal Protective Equipment) for the task at hand. Prepare a surface with a soft, clean towel or similar where you can place the door during these steps.

1. Carefully prise off the cover cap for the top hinge and unscrew the screws fixing the top hinge to the appliance, you should support the door whilst doing this.
2. Carefully remove the door from the bottom hinge (by lifting) and place it somewhere safe. Note that there may be spacers between the door and the hinge; note how many and their position.
3. Swap the previous top hinge to the opposite side at the bottom.
4. Place the door onto the new bottom hinge. Support it.
5. Refit the “new” top hinge and fix securely to the appliance.
6. Fit the central cover caps and top hinge cover pieces in place to complete the process.
7. Unscrew all four slider brackets from the door and swap them over to the side furthest from the new hinge positions, before the decor door is fitted.

Ensuring the door seals correctly:

It is normal for the seal to be compressed after the door has been reversed. With the door closed, use a hair dryer to expand the seal and fill the gap between the door and the body of the appliance. Take care not to use the hair dryer too close to the appliance, which could damage the seal. A distance of approximately 10cm should be adequate. When completed, allow the seal and door to cool before touching them. Once done, the seal should remain in position.

Maintenance & Cleaning

Always disconnect the appliance from the power supply before any cleaning or maintenance.

The drawer sections should be cleaned using a solution of bicarbonate of soda and lukewarm water. Do not use abrasive products or detergents. After washing, rinse and dry thoroughly.

Clean the compartments separately by hand with a mild solution of washing up liquid and water. Do not use abrasive cleaners or detergents.

If the appliance is not to be used for prolonged periods of time, unplug and clean the appliance. The doors should be left slightly ajar to prevent the formation of mildew and unpleasant odours.

THIS PAGE IS INTENTIONALLY LEFT BLANK

Troubleshooting

If you have any problems with your appliance, you should check the troubleshooting prior to calling CDA Customer Care.

If the appliance is not working, check:

- That there is power to the appliance.
- The house fuses are intact and the fuse in the plug has not blown.
- The freezer has not been turned off
- The plug socket is functioning fine. To check this, plug another electrical appliance in to see if the socket is faulty.

If the appliance is working, but not very well, check:

- The appliance is not overloaded.
- The thermostat is set to an appropriate temperature.
- The doors are closing properly.
- The cooling system at the rear of the appliance is clean and free of dust, and not touching the rear wall.
- There is enough ventilation at the side and rear walls.
- This can be due to the decor door(s) not being properly fitted, causing the freezer door to not close properly thus letting warm air in. If you are at all unsure, ask your fitter to check the decor doors.

If the appliance is noisy, check:

- The appliance is level and stable.
- The side and rear walls are clear, and there is nothing resting on the appliance.
- Note: The cooling gas in the system may make a slight bubbling or gurgling noise, even when the compressor is not running.

If the appliance is beeping, check:

- That the door is closed. An alarm will sound after approximately 60 seconds of a door being open.

If there's water in the base of the freezer, check:

- Check that there is some resistance when opening the door of the appliance. If it opens at the slightest touch it may mean that the door seal needs to be replaced.
- Check the door seal for any kinks, debris or damage. If you notice any, and are unable to resolve the issue yourself, contact ... Customer Care so that the seal can be replaced.
- This can be due to the decor door(s) not being properly fitted. If you are at all unsure, ask your fitter to check the decor doors.

If excessive ice has formed in the freezer:

- It is normal for some ice to form in the freezer. This does not constitute a fault with the appliance.
- Check that there is some resistance when opening the door of the appliance. If it opens at the slightest touch it may mean that the door seal needs to be replaced.
- Check the door seal for any kinks, debris or damage. If you notice any, and are unable to resolve the issue yourself, contact ... Customer Care so that the seal can be replaced.
- This can be due to the decor door(s) not being properly fitted. If you are at all unsure, ask your fitter to check the decor doors.

Some minor faults can be fixed by referring to the troubleshooting tips above. If not please contact our customer care team on **1300 11 4357** or visit our self help portal online **www.support.residentiagroup.com.au**.

Electrical Information

Warning! This appliance must be earthed.

The mains lead of this appliance has been fitted with a BS 1363A 13 Amp fused plug. To change a fuse in this type of plug, follow the steps below:

1. Remove the fuse cover and fuse.
2. Fit replacement 13A fuse, ASTA approved to BS 1362 type, into the fuse cover.
3. Replace fuse cover.

Important: Do not use the appliance without the fuse cover in position.

How to connect an alternative plug

If the fitted plug is not suitable for your socket outlet, then it should be cut off and disposed of safely to avoid possible shock hazard. A suitable alternative plug of at least 13 Amp rating to BS 1363 should be used.

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:-

- The wire which is coloured GREEN and YELLOW must be connected to the terminal which is marked with letter (E) or by the Earth symbol \perp or coloured GREEN and YELLOW.
- The wire which is coloured BLUE must be connected to the terminal which is marked with the letter (N) or coloured BLACK.
- The wire which is coloured BROWN must be connected to the terminal which is marked with the letter (L) or coloured RED.

If in doubt regarding the electrical connection of this appliance, consult a qualified electrician. Do not shorten the supply cable, the appliance may require removing for servicing.

N.B. Ensure that the plug socket is situated in an easily accessible place after installation.

E & O E. All instructions, dimensions and illustrations are provided for guidance only. ... reserve the right to change specifications without prior notice.

Warranty Information

AUSTRALIAN WARRANTY TERMS & CONDITIONS REFRIGERATION APPLIANCES

This document sets out the terms and conditions of the product warranties for Residentia Group Appliances. It is an important document. Please keep it with your proof of purchase documents in a safe place for future reference should you require service for your Appliance.

1. IN THIS WARRANTY

- (a) 'acceptable quality' as referred to in clause 10 of this warranty has the same meaning referred to in the ACL;
 - (b) 'ACL' means Trade Practices Amendment (Australian Consumer Law) Act (No.2) 2010;
 - (c) 'Appliance' means any Residentia Group product purchased by you accompanied by this document;
 - (d) 'ASR' means Residentia Group authorised service representative;
 - (e) 'Residentia Group' means Residentia Group Pty Ltd of 165 Barkly Avenue Burnley VIC, ACN 600 546 656 in respect of Appliances purchased in Australia;
 - (f) 'major failure' as referred to in clause 10 of this warranty has the same meaning referred to in the ACL and includes a situation when an Appliance cannot be repaired or it is uneconomic for Residentia Group, at its discretion, to repair an Appliance during the Warranty Period;
 - (g) 'Warranty Period' means:
 - (i) where the Appliance is used for personal, domestic or household use (i.e. normal single family use) as set out in the instruction manual, the Appliance is warranted against manufacturing defects for 24 months (or 36 months where a valid extended warranty registration has occurred), following the date of original purchase of the Appliance;
 - (h) 'you' means the purchaser of the Appliance not having purchased the Appliance for re-sale, and 'your' has a corresponding meaning.
2. This warranty only applies to Appliances purchased and used in Australia and is in addition to (and does not exclude, restrict, or modify in any way) any non-excludable statutory warranties in Australia.
 3. During the Warranty Period Residentia Group or its ASR will, at no extra charge if your Appliance is readily accessible for service, without special equipment and subject to these terms and conditions, repair or replace any parts which it considers to be defective. Residentia Group or its ASR may use remanufactured parts to repair your Appliance. You agree that any replaced Appliances or parts become the property of Residentia Group. This warranty does not apply to light globes, batteries, filters or similar perishable parts.
 4. Parts and Appliances not supplied by Residentia Group are not covered by this warranty.
 5. You will bear the cost of transportation, travel and delivery of the Appliance to and from Residentia Group or its ASR. If you reside outside of the service area, you will bear the cost of:
 - (a) travel of an authorised representative;
 - (b) transportation and delivery of the Appliance to and from Residentia Group or its ASR, in all instances, unless the Appliance is transported by Residentia Group or its ASR, the Appliance is transported at the owner's cost and risk while in transit to and from Residentia Group or its ASR.
 6. Proof of purchase is required before you can make a claim under this warranty.
 7. You may not make a claim under this warranty unless the defect claimed is due to faulty or defective parts or workmanship. Residentia Group is not liable in the following situations (which are not exhaustive):

-
- (a) the Appliance is damaged by:
- (i) accident
 - (ii) misuse or abuse, including failure to properly maintain or service
 - (iii) normal wear and tear
 - (iv) power surges, electrical storm damage or incorrect power supply
 - (v) incomplete or improper installation
 - (vi) incorrect, improper or inappropriate operation
 - (vii) insect or vermin infestation
 - (viii) failure to comply with any additional instructions supplied with the Appliance;
- (b) the Appliance is modified without authority from Residentia Group in writing;
- (c) the Appliance's serial number or warranty seal has been removed or defaced;
- (d) the Appliance was serviced or repaired by anyone other than Residentia Group, an authorised repairer or ASR.
8. This warranty, the contract to which it relates and the relationship between you and Residentia Group are governed by the law applicable where the Appliance was purchased.
9. To the extent permitted by law, Residentia Group excludes all warranties and liabilities (other than as contained in this document) including liability for any loss or damage whether direct or indirect arising from your purchase, use or non use of the Appliance.
10. For Appliances and services provided by Residentia Group in Australia, the Appliances come with a guarantee by Residentia Group that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the Appliance repaired or replaced

if the Appliance fails to be of acceptable quality and the failure does not amount to a major failure. The benefits to you given by this warranty are in addition to your other rights and remedies under a law in relation to the Appliances or services to which the warranty relates.

11. At all times during the Warranty Period, Residentia Group shall, at its discretion, determine whether repair, replacement or refund will apply if an Appliance has a valid warranty claim applicable to it.
12. Missing parts are not covered by warranty. Residentia Group reserves the right to assess each request for missing parts in a case by case basis. Any parts that are not reported missing in the first week after purchase will not provide free of charge.
13. To enquire about claiming under this warranty, please follow these steps:
 - (a) carefully check the operating instructions, user manual and the terms of this warranty;
 - (b) have the model and serial number of the Appliance available;
 - (c) have the proof of purchase (e.g. an invoice) available;
 - (d) telephone the numbers shown below.
14. You accept that if you make a warranty claim, Residentia Group and its ASR may exchange information in relation to you to enable Residentia Group to meet its obligations under this warranty.

IMPORTANT

Before calling for service, please ensure that the steps in point 13 have been followed.

Telephone contact

- Service: Please call 1300 11 HELP (4357)

The Australian Consumer Law requires the inclusion of the following statement with this warranty: Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Warranty Information (Continued)

NEW ZEALAND WARRANTY TERMS & CONDITIONS COOKING APPLIANCES

To help care for your investment, be sure to register your appliance online. Registration will help you if you need to arrange service in the future, and serves as a record of your purchase – including critical information like model number and serial number – that you can refer to at any time.

Simply visit the below website, or ask your retailer for help: www.inalto.house/nz/registration

WARRANTY:

These products are covered by a warranty for a period of 24 months from the date of purchase, subject to the following conditions*. The warranty covers rectification free of charge of any fault arising from defective materials or components, or faulty workmanship or assembly.

* The conditions above mentioned are:

1. That the purchaser carefully follows all instructions packed with the product;
2. That the purchaser and/or installer carefully follows the installation instructions provided and complies with electrical wiring regulations, gas and/or plumbing codes;
3. That the purchaser carefully follows instructions provided in the owner's handbook relating to the proper use and care of the product and does not use the product for any purpose other than the domestic use for which it has been designed;
4. Commercial use of the product for professional or industrial purposes will void this warranty.;
5. That the product was purchased and installed in New Zealand;
6. That this warranty does not extend to:
 - a) optional glass lids for hobs apart from claims which relate to mechanical or physical damage thereof at the date of purchase;
 - b) 'consumable' parts such as light bulbs or filters;
 - c) damage to ceramic glass caused by liquid or solid spill-overs, lack of maintenance, or impact;
 - d) damage to surface coatings caused by cleaning or maintenance using products not recommended by the owner's handbook;
 - e) defects caused by normal wear and tear, accident, negligence, alteration, misuse or incorrect installations;
 - f) a product dismantled, repaired or serviced by any serviceman other than an authorised service agent;

- g) a product not in possession of the original purchaser;
- h) damage caused by power outages or surges
- i) damage caused by pests (eg. rats, cockroaches etc.)

7. That if the product is a freestanding microwave oven or small appliance it must be returned to the dealer/retailer for servicing. These products, unless stated otherwise, have a 12 month warranty from original date of purchase with 24 months on the microwave magnetron; Waste disposers have a 12 month warranty.
8. The provision of service under this warranty is limited by a 25km boundary from the retailer where the product was purchased except for microwaves. Such travelling outside of these limits will incur commercial cost to be paid by you, regulated by the number of kilometres travelled beyond the 25km limit (50km return trip). Microwaves are to be delivered to the nearest authorised service agent by the customer.

Please refer to your user manual for any further conditions that may apply to your specific model.

Nothing herein contained shall be construed in any way as excluding or limiting your rights under the Consumer Guarantees Acts 1993.

For Service please visit www.applico.co.nz/service or contact the dealer/retailer from whom you purchased the product from or call the 0800 number listed below. If you are unable to establish the date of purchase, or the fault is not covered by this warranty, or if the product is found to be in working order, you will be required to bear all service call charges.

Registration of this warranty constitutes acceptance of the terms and conditions of this warranty.

Should you require any assistance, please call Customer Services on 0800 763 448.

Distributed by Applico Ltd.
