Smart Inverter technology

A continuous flow of true power levels throughout the entire cooking procedure.

At Sharp Australia, we are firmly committed to meeting Australia's cooking preferences with smart creations. All menus, auto/manual cooking charts and recipes for Sharp microwave ovens are developed and tested with locally sourced produce and the Australian consumer in mind.

Building on over 50 years of experience, the Sharp range of conventional, convection and commercial microwave ovens offer smart technologies, such as innovative smart sensor and smart inverter that blend into your kitchen décor and make it easy to produce meals quickly with food that looks and tastes great.

Smart Convection

This Microwave Oven can be used as a Conventional Oven using the fan-forced Convection function. This provides more versatility in the kitchen and allows you to cook a variety of delicious meals all in the one microwave oven. With Smart Convection technology fan-forced heat is circulated evenly around the oven cavity, producing food that is brown and crisp.

Smart Inverter

Cook with confidence using Inverter Technology as it ensures faster cooking, reheating and defrosting times through the controlled delivery of true power levels. A continuous flow of true power levels throughout the entire cooking procedure will reduce problems such as uneven cooking and the development of hotspots.

LED Text Display

Newly implemented 7 digit LED display allows for a more user friendly experience.

The 7 digit LED display allows for more information to be shown making it much more easier to read, understand and interpret functions, cooking menus, and overall interaction with the microwave.

CONVENIENCE

Smart Convection/Combi Cooking

The Smart Convection/Combi feature enables a combination of microwave power and fan-forced convection heat alternately. The combination cooking reduces cooking time and provides a crisp, brown finish giving you the convenience of fast cooking with a traditional appetising appearance.

Favourites Key

Program and save 3 frequently used program settings in the memory key button for quick use.

Child Lock

This feature is used to prevent unsupervised operation of the oven by children.

Extend the Cooking Time

You can extend the cooking time during manual, grill, convection, combi cooking and time defrost in multiples of 30 seconds by pressing the +30S/START button while oven is in operation.

LED Light

Led light inside microwave for brighter illumination while cooking, whilst also consuming less power.

Smart Auto Menus

28 Smart Auto Menus have been pre-programmed with a cook time and power level to make cooking and reheating more convenient. These menu items are outlined below.

FEATURES	SMART MENU ITEMS
Reheat Cook	Beverage and dinner plate Rice, Pasta, Frozen & Fresh Vegetables, Potato, Jacket Potato, Quinoa Sweet Potato
Defrost	Mince, Steak/Chops, Poultry, Roast meat
Melt/Soften	Butter, Chocolate, Cream Cheese
