Choice of black or white glass

Option of natural gas or LPG

Available with cast iron trivets

Solid brass burner rings and bases

Bevelled edge glass

ABOUT US

Goldline has been designing stove top solutions to household problems since 1990.

Our proud innovation heritage is based on a pioneering spirit & a desire for change, and presents a challenge to conventional appliances.

We provide only the best gas cooktops and high power wok burners that combine beauty and functionality. Thoughtfully crafted in design & layout, our models ensure a luxury cooking experience.

Boasting high powered burners for the most intense heat & flavour and state of the art safety features you can be sure a Goldline cooktop will reward you in terms of innovation & quality. Some Goldline cooktops are designed specially for small and narrow spaces featuring innovative features for chefs, including our specially crafted design layout, to ensure that no burners are excluded from use when cooking with large woks or pots.

AN AUSTRALIAN COMPANY YOU CAN TRUST

Goldline allows for a personal touch not only in customer service and experience but in our unique ability to offer tailored solutions, from narrow bench tops for small spaces, to tailored stove tops with extra space and heating functionality, Goldline has you covered.

QUALITY YOU CAN RELY ON

With thoughtful burner placement and precision power control, you can be sure that Goldline will be your best friend in the kitchen.

COMPANY HISTORY

How it all started

I received my discharge from the R.A.N. after nine years of service. It was at this time, around the mid 70's that I began my first company. I first began as a registered builder, catering predominately to the Asian community here in Australia.

My clients were always saying to me that the cooktops on the market here were not powerful enough and the layout wasn't right to obtain optimum usage out of all the burners.

I knew there was a business opportunity ready to be explored. I grew up in a family of ten where I remember watching my mother juggling pots and pans on her 4 burner upright cooker and thinking that there must be a better way.

Understanding that there was a gap in the market for good, functional cooktops and remembering how much my mother struggled with her cooker, I was motivated to do something about it.

“In 1991 I launched the very first three-burner cooktop with two wok burners into the market.”

In 1991 I launched the very first three-burner cooktop with two wok burners onto the market.

Sales were quite slow in the beginning. It was in 1992 when the marketing manager of a large corporation in Hong Kong saw my cooker on display during a visit to Australia. I sent a sample of the cooker overseas to company and within a few years, sales had jumped to \$4 million a year.

Our business grew and in 1996 we were a finalist in two sections of the Telstra business awards followed by the Premier's business awards. To add to our recognition was the HSBC Business awards and the Australian Chamber of Commerce awards, Pursuit of excellence of the Victorian Government and the Hong Kong Australia Business Association awards.

Our exports continued to grow and we were exporting to Taiwan, Thailand, Mauritius, Singapore, and Malaysia. The product range has expanded from that first model to more than 14 different models, always maintaining that criteria I observed years ago as a young man watching my mother and listening to my clients.

Today we are proud of the fact that we are still an Australian owned and operated business, finding success in a very competitive marketplace.

🔥
Available in natural gas or LPG

⚙️
Detachable wok ring

The 90 cm Gas on Glass 5 Burner Cooktop is an excellent choice for your complex cooking needs. At Goldline Corp, we designed the cooktop with many advanced features to enhance the cooking experience.

ENHANCED COOKING

With five burners, including a dual control wok burner, you can cook large meals in no time. You also get more power and better control with advanced features.

MATCHES THE INTERIOR

The cooktop is manufactured using excellent quality black reflective glass that can match your kitchen and add value to the interior.

STANDARD SAFETY

Flame Failure Device (FFD) is a feature that cuts the gas supply to burners as soon as the flame extinguishes. It minimises the risks of accidental fire damages due to cooktop issues.

EASY CLEANING

The glass construction, detachable wok stand, and detachable spillage bowl make the cleaning and maintenance of the gas on glass hob hassle-free.

PRECISION RESULTS

The gas on glass cooktop provides a holistic cooking experience with a dual control wok burner, 2 simmer burners, and 2 boiler burners. The inner and outer rings of the dual control wok burner are independent, and you can adjust heating precisely based on your cooking needs.

GLS5 90CM 5 BURNER

Goldline's powerful cooktop featuring dual boiler burners and a high performance wok burner rated at 18 MJ/hr.

Cooking solutions that caters for the diversity of our country's cooking styles. From casual alfresco to formal entertaining, Goldline's lifestyle range offers performance & practicality together with modern styling.

PRECISION HEATING

Features like dual control wok burner ensure optimal heating. It offers a multi-flame control feature that helps you set precise heat settings. You can sizzle, simmer, roast, and stir-fry without moving the pan to different burners. The outer ring and inner ring flame controls are independent, and this helps you control the heat better. With a detachable wok stand, you will find the cooktop easy to clean and maintain.

Flame Failure Device (FFD) cuts the supply of LPG or natural gas to the burner as soon as the flame extinguishes. Our cooktops also feature high-powered wok burners and electronic ignition.

VERSATILITY

All Lifestyle series cooktops are ideal for both LPG and natural gas and come with an LPG conversion kit. They come with a complimentary wok trivet to compliment all your cooking needs. With the control knobs, you can adjust the heat hassle-free.

LONG-LASTING, QUALITY DESIGN

The cooktops have a compact and stylish design, allowing you to use the burners simultaneously with ease and comfort. Every cooktop is manufactured using high-quality glass and showcases excellent strength and durability.

LIFESTYLE SERIES

Gas cooktops designed specifically for cooks with a cultural specification

-  European designed high-powered burners
-  Heavy duty cast iron grids
-  Dual control
-  2-year warranty
