

Warranty

Fuji Electric Corp. of America warrants that each Fuji Electric Regenerative Blower is free from defects in material and workmanship at the time of shipment. This warranty covers the period of eighteen months following the date of shipment. Thermal protection must be connected as recommended.

The product or parts found to be defective in materials or workmanship during this period will be repaired or replaced at no charge to the customer. This warranty does not apply to any product or parts subject to damage in transit, accident, misuse or abuse.

Damage to the blower by applying incorrect voltage is considered misuse and is not covered by warranty. The warranty process requires that the unit be returned to Fuji's Warranty Service Center for evaluation. The cost of freight to the Service Center is to be borne by the customer. Blowers which are deemed to be covered under the warranty will be repaired or replaced to the customer. Note that evidence of water internal to the blower voids the warranty.
