

MATCHA SET

Perfect for any grade of matcha powder

1 Use a fine mesh strainer to sift the specified amount of matcha into the matcha bowl.

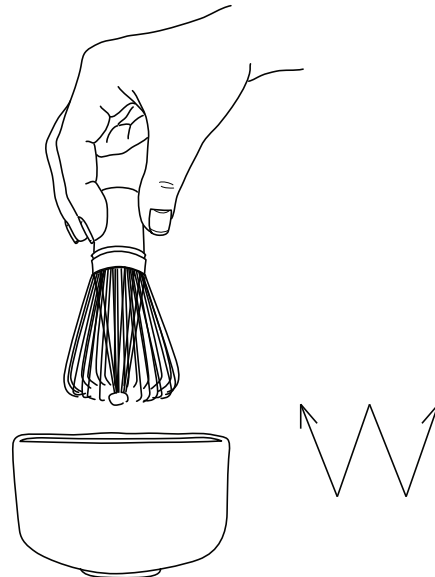

2 Heat water to the specified temperature in a separate pot or kettle.

3 Pour the specified amount of water down the side of the matcha bowl to prevent scorching the matcha.

4 Hold the matcha whisk between your thumb, forefinger and middle finger like a pencil.

5 Briskly trace a "W" shape back and forth in the matcha bowl with the whisk until the matcha becomes frothy.

6 When ready, sip the matcha straight from the bowl, pour it over milk for a latte, or pour it over ice cream for an affogato.

ENJOY!
