NEAT TIP
Nightstands can become landing spots for items that don't have a home. Store only nighttime necessities within the drawers (notebook, pen, earplugs).

CONSIDER SCALE

Interested in a four-poster bed? It's best in a space with nine-foot ceilings or higher, says McGee. Otherwise the room could feel cramped.

Shea McGee

Feel free to mix metals in a space like this, says the Salt Lake City, Utah-based designer. In fact, the variety prevents the room from feeling one-note. The key, she explains, is to "separate metals by height." Here, the lamps at eye level are nickel, while the nightstand knobs are brass.

MASTER SUITE

Touchable elements, like linen-coated nightstands, feathery fronds, and a geometric bathroom stool, keep the simple space from feeling boring. The minimal design focuses on contrast between navy and white to create a balanced bedroom oasis.
