## Taking Your Measurements

While taking your measurements, make sure you are standing up straight and comfortably.

### 1. BUST / CHEST

Measure under your arms, around the fullest part of your chest.

### 2. WAIST

Measure around the narrowest part of your waist, generally located between the bottom of your rib cage and belly button.

### 3. HIPS

Legs together, measure around the fullest part of your hips and rear.

### 4. INSEAM

Measure from crotch down to your desired length.

Each jean style will have 1-2 leg length selections available.

## Fit Guide

Our fit guide is designed to give you an idea of how your jeans will fit, move, and feel. Each of our styles fall into the category of either rigid/low stretch, comfort stretch, or high stretch. You can find each jean's level of stretch on the product page under the tab 'fit guide'.

### RIGID/LOW STRETCH

### COMFORT STRETCH

### HIGH STRETCH

#### ***Our recommendation:***

In our Rigid/Low-Stretch denim, many customers choose to size up by half a size in comparison to the size they generally wear in denim.

#### ***How it will feel:***

Our Rigid/Low-Stretch denim has very little (1%) or no elastane. This denim has a beautifully soft and comfortable feel and will feel firm on first wear and continue to grow softer over time.

#### ***Our recommendation:***

In our comfort stretch denim we recommend selecting the size you generally wear in denim. These pieces fit true to size.

#### ***How it will feel:***

Trustworthy feeling denim with just enough stretch for comfort and movement. This jean will feel firm but comfortable on first wear, and will naturally, subtly relax to your body with wear.

#### ***Our recommendation:***

In our high stretch denim, many customers choose to size down by half a size in comparison to the size they generally wear in denim.

#### ***How it will feel:***

Super stretch denim, but still feels like beautiful, genuine denim (and not leggings!). This denim will hold and support you in all the right places from its no-gape waistband, to ankle-hugging hem. Our stretch denim has great recovery so you won't have jeans that lose their shape - just one of the many perks of buying our premium denim.

## Product Recommendations

While our size guide is generally accurate, here are a few additional recommendations for our core denim range.  
For any core product not listed here, please follow the size guide on previous pages.

Lucy	Bloom	True to size	Size consistently with what you would usually wear
Lucy	Ink	Runs large	Size down one size
Lucy	New Blue	Runs large	Size down one size

***What if I am in between two sizes according to the size guide?***

If you're in between two sizes, we recommend selecting the smaller size. If your waist and hip measurements are different sizes, we recommend selecting the size in the middle.

***Will my jeans stretch over time?***

On first wear, your jeans should fit snug, but not uncomfortably tight around your waist. You can expect most jeans to subtly relax by half a size and mould to your body to be uniquely yours. All of our garments are made with premium stretch denims that will not stretch out of shape over time.

## Denim Care

A planet approved guide to caring for your denims and protecting the longevity of your favourite jeans.

### Wear well, wash less.

Want to save over 2000 litres of water per year? We'd suggest washing your jeans once a month as opposed to once a week. Denim ages better when it is washed less.

### Wash cold.

Over time, heat can cause fading or damage to your jeans. Up to 90% of the energy consumed in washing can be attributed to water heating. Save energy by using your machine's cold cycle.

### Wash gently.

Hand wash or use a delicate cycle with a little eco-friendly fabric softener to protect the longevity of your jeans and reduce the release of microfibres.

### Hang out to dry.

Air dry to avoid unnecessary energy use and protect the longevity of your jeans. Skip the iron too, any creases will iron out naturally after a few minutes of wear.
