

LED Lighting

All cabinets come standard with the latest in LED lighting technology from VIPARSPECTRA®. One of the best reviewed LEDs for value on the market, these lights are growing high-quality cannabis all over the world. The secret to success is the optimized spectrum of light, providing plants with everything they need through the vegetative and flowering stages. The results are healthier plants and higher yields, all while saving energy costs. We optimize the light coverage by lining the growing area in high-reflective and odour-containing mylar.

SINGLE DOOR V300

DOUBLE DOOR V450

- Optimal Full Light Spectrum
- Balanced PAR/Lumen Output
- Aluminum Cooling Heat Sinks
- High Speed Quiet Fans
- Reflector-series for wide coverage

- 300W Output = 132 Watt Pull
- 450W Output = 200 Watt Pull
- 70% more efficient than HPS
- 100,000+ hours lifespan
- 2-Year Technical Warranty

- WIFI Connection
- Voice Control
- Remote Control
- Timer Setting
- Device sharing

SMART PLUG ADAPTERS

Featuring Smart Controls, you set timers and control the light with your smartphone.

MYLAR LINED-INTERIOR

Solar Reflective, Waterproof, Heat Insulating, Odour Containing, Corrosion Resistant, and Puncture & Tear Resistant. All cabinets are lined internally with highly reflective mylar film for maximum light penetration.

ONE- BUTTON ADJUSTABLE LIGHT PULLEYS

All LED Lights are mounted on adjustable pulleys, so you can easily control the height & direction of light with a press of a button.

QUANTUM BOARD LIGHT UPGRADE

Optimal Performance LED Grow Lights

2.7 $\mu\text{mol/J}$

New SMD LEDs

High efficiency, better light penetration

796 $\mu\text{mol/m}^2/\text{s}$

High PPFD, Uniform Output

Achieve better results than HID

Real Heat Sink

Powerful heat dissipation ability

Optimal Full Spectrum

Healthy plants & amazing yields

More Flexible Dimmer

Customize brightness for plants

3 Years

Trusted Warranty

Buy now and worry-free

If you're looking to boost your yields and maximize every inch of growing space in your cabinet, we're happy to offer Quantum Board Lighting upgrades on any cabinet. The latest and greatest tech in cannabis cultivation, these full spectrum LEDs are the closest thing to real sunlight. The full spectrum of light is bright white, in comparison to the red/blue optimized broad spectrum of the standard LEDs which appear purple to the human eye. These lights will highlight the natural greens and colours of your plant. With a Meanwell Driver, 300 high-intensity SMD LEDs, and an adjustable dimmer, these lights are for the serious grower and should expect to see a 10-20% increase in your harvest.
