**CHOICE**  
IS EASY!

**From this**

**To This!**

## A REVOLUTIONARY NEW SYSTEM

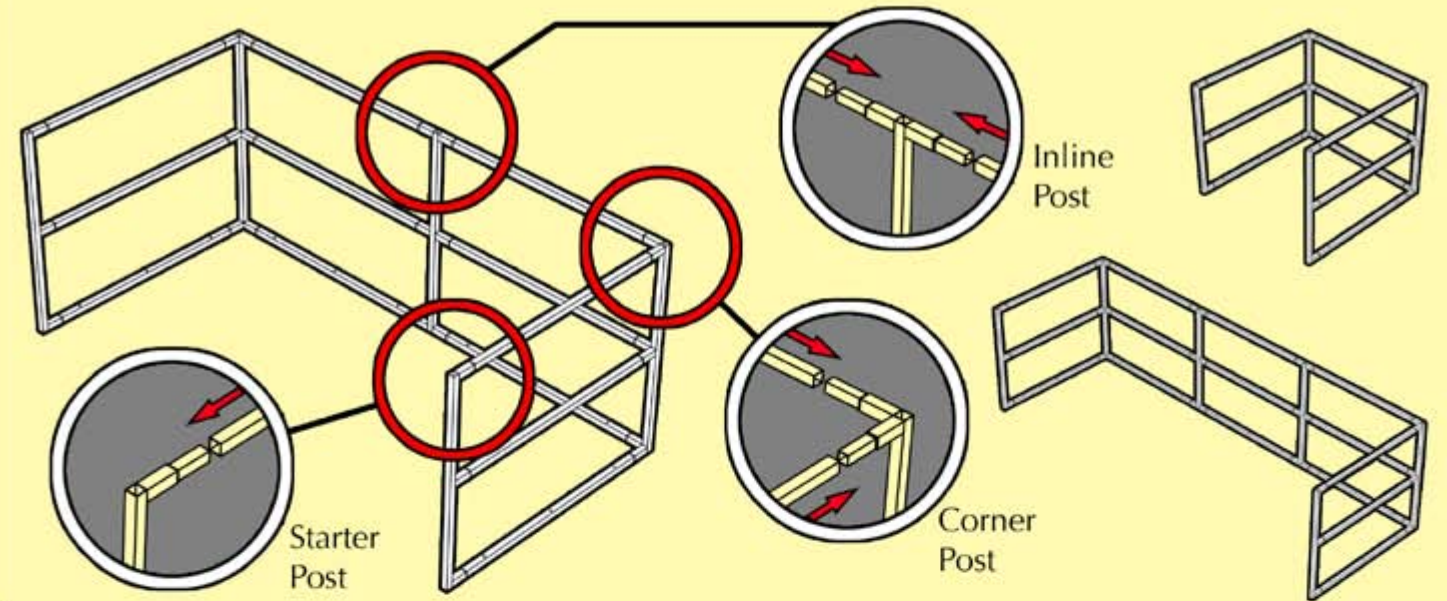

- FAST & EASY SET UP FROM START TO FINISH
- THE LOOK OF REAL STONE, BRICK AND WOOD
- DURABILITY THAT INCLUDES A 10 YEAR WARRANTY
- MATCH THE LOOK OF EXISTING STRUCTURES WITH CUSTOMIZABLE OPTIONS
- HEAVY DUTY GATE SYSTEM
- COST AND TIME SAVING OVER LABOR INTENSIVE MASONRY
- SELF SUPPORTING FRAME

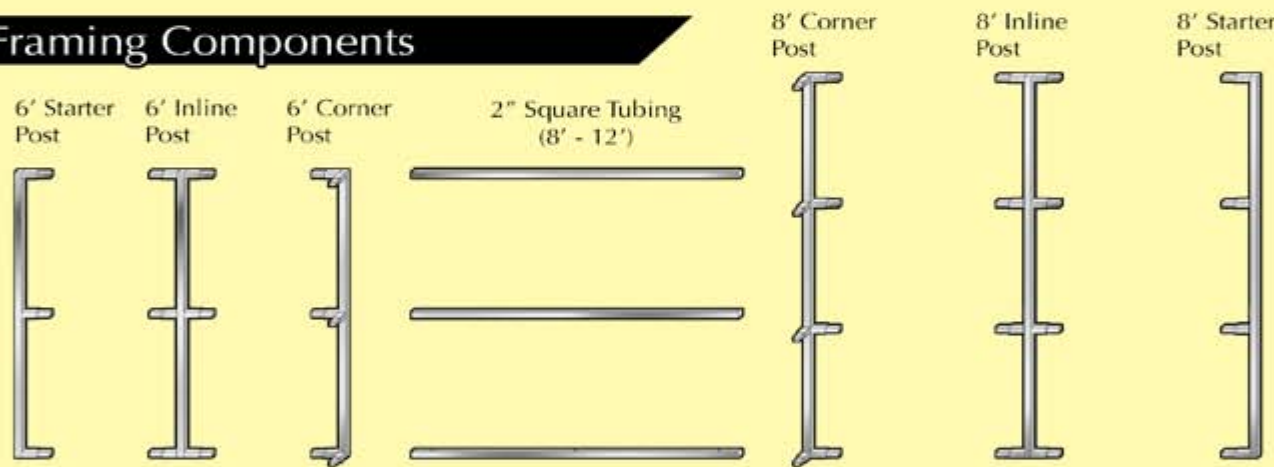

The **CHOICE ENCLOSURES** System is a relatively new category that is classified as "modular panel system" design which provides outstanding aesthetics, design versatility and cost savings. This system can be installed in 1 to 1.5 days as opposed to 2-3 times the time of a masonry system. This brochure will provide information on how the system works and on all the wall and gate options and design versatility.

## • Framing Configuration

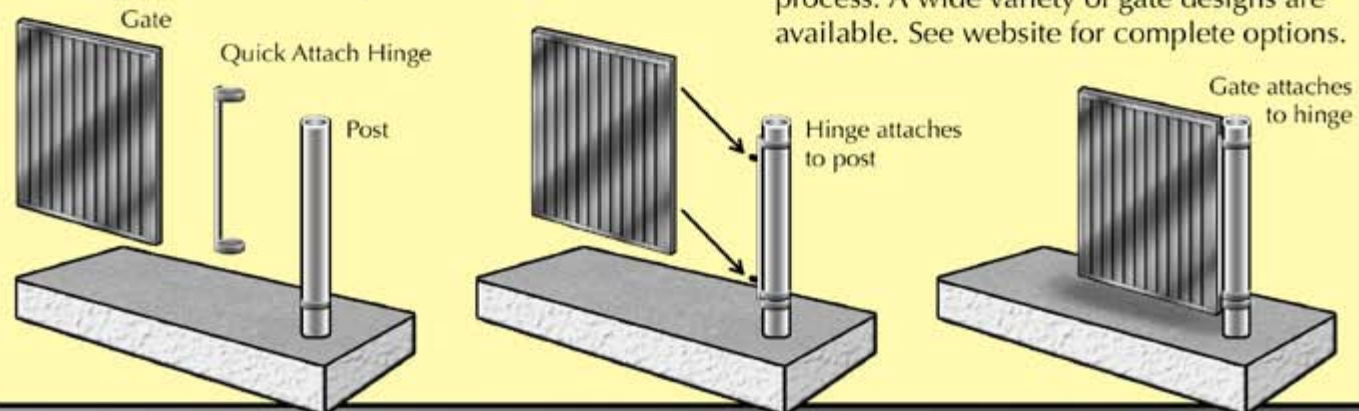

The system is based on a unique design where the horizontal square tubing quickly slides into any of the three posts types.

## • Framing Components

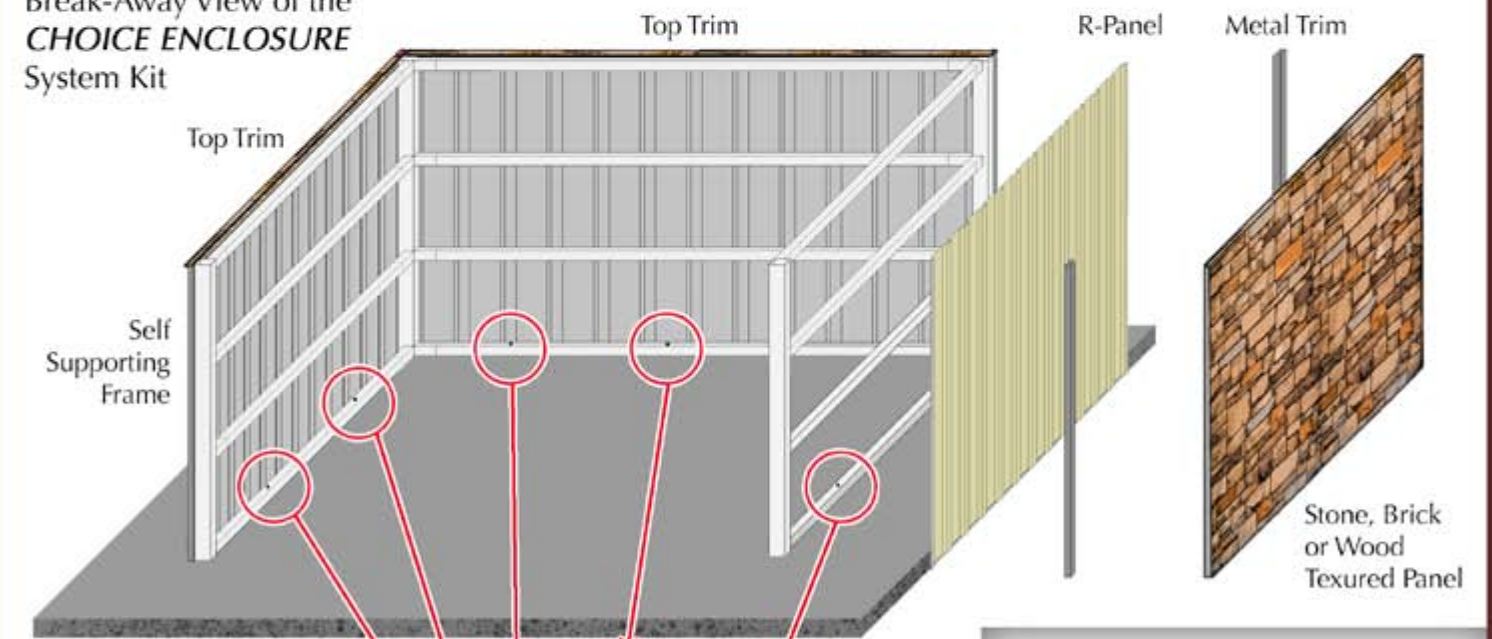

## • Hinge & Gate System

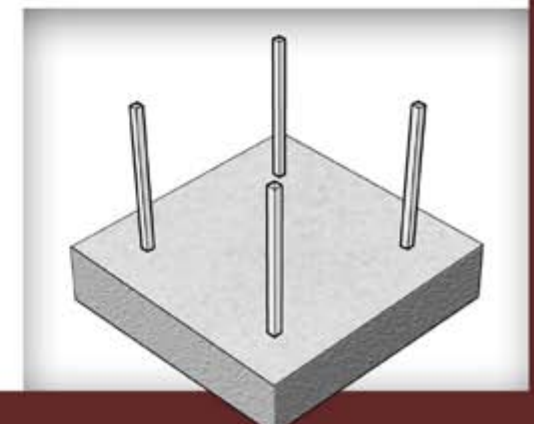

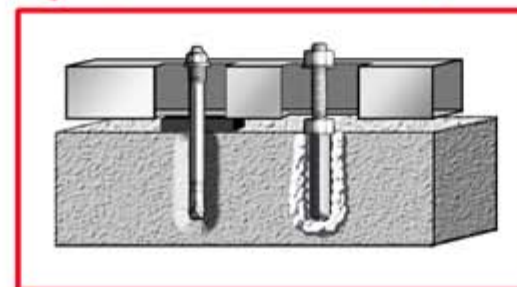

Shown here is a unique system that allows the gate to be attached *without* a welding process. A wide variety of gate designs are available. See website for complete options.

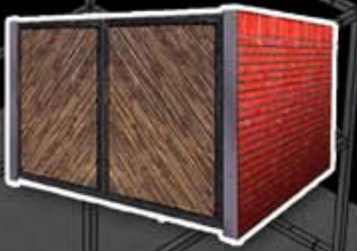

## Break-Away View of the CHOICE ENCLOSURE System Kit

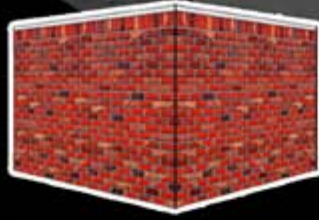

The bottom rail will have pre-drilled holes for the bolt system that can be based on an expanding concrete anchor or epoxy gluing a threaded rod into the deck.
