

Classic Series Speaker Stand TS-70B

The TS-70B Classic Series speaker stand is the strongest tripod speaker stand in its class. In our load tests, the TS-70B has never lost a head-to-head comparison with stands often costing much more. It features a glass-reinforced polycarbonate collar and fittings that are 3x to 5x stronger than the nylon collars and fittings typically used by other stands in this price range. The TS-70B is the strongest tripod speaker stand built for the budget-minded musician.

Strong Fittings

All the fittings and collars are made from glass-reinforced polycarbonate. This material is more durable than plastic and more cost effective than metal.

Lightweight Tubing

The speaker stand is constructed from lightweight aluminum tubing that is strong enough to hold your speaker.

Secure Locking Pin

For added support the TS-70B includes a safe and secure locking pin that locks the telescoping tube in place.

Strongest Speaker Stand in its Class

Time and again, the TS-70B outperforms competitor stands in the same class and price range by 3 to 4 times load capacity. Simply put, this is one of the strongest, most affordable speaker stands on the market.
