Dome Glamping in Nature

8m/26' or 9m/30'

- High enough to build a loft with a second bed
- Enclosing bathroom and kitchenette underneath
- Great for welcoming groups and larger families.

7m/23' or 8m/26'

- Spacious enough to add features like pony walls, bathrooms, kitchenettes & more!
- A more affordable model with similar interior capabilities
- Great for hosting couples or small families

5m/16' or 6m/20'

- Perfect as a simple bedroom and living space where exterior washroom facilities are available
- Small exterior footprint, fitting in most backyards
- Great for singles or couples

Dome Glamping Bedroom Ideas

A highly profitable venture - Airbnb, HipCamp, Vrbo,
the list goes on!

Our customer ventures, Canadian campgrounds & resorts have found great success with their glamping domes - solid bookings, often with waitlists, at a high price per night (\$200 or more).

Depending on the size of dome, your interior design capabilities are endless. Additional sleeping arrangements can increase your nightly rates, bring in more guests, and offer a more fulfilling glamping experience.

Glamping Dome

LOUNGE IDEAS

Outfit your space any way you'd like

Our Panoramic Window offers clear views of the outside world, with all of the comfort from within. This epic zip-off feature adds an elevated sense of luxury to your glamping destination.

Your dome can be assembled easily, in 1 to 3 days, by a team of 3+ people. Compared to a full chalet or cabin, the cost of a dome is extremely affordable.

GLAMPING DOMES

Kitchen Ideas

Whether it be a coffee bar or full kitchen set up, your glamping dome can facilitate almost any kitchen installation, depending on your dome size and contractor's abilities!

Glamping Domes

BATHROOM IDEAS

Interior bathrooms can be added to our glamping domes. This is an excellent alternative to outdoor bathrooms and increases comfort, and hence the nightly price you can charge.

DOME GLAMPING LOFT IDEAS

- Increased usable space: Maximizing the available living area within a compact footprint.
- Unique aesthetic appeal: Adding a distinctive architectural element to the space creating an attractive look.
- Efficient heating and cooling: As warm air rises, the loft allows for efficient natural ventilation, improving airflow and reducing energy consumption required for heating and cooling.
- Enhanced privacy for those glamping with family, and friends!
