

An Awning for your Dome

PHOENIX DOMES

An Awning can be a great addition to a geodesic dome. While our new Deluxe glamping package domes come with a build-in 1' mini-awning to protect your door from the elements, it is not very difficult to add an awning of any size to any Dome. Let's see a few examples of what our customers have created:

Created by Phoenix Domes' creative builder Tovel, this awning made from wood and glass is a stunning addition to this 26' living dome!

Azenya's Hexagon Awning

the cover was cut around the door to create sidelights, and glued to overlap the awning itself for waterproofing.

Honest Farms on Salt Spring Island created this large space for their yoga students to leave their shoes. They pulled the cover edge above the door up over a piece of wood to shed any water off to the sides.

Phoenix Farm's own Temple dome - the original homemade one Freyja built in 2015 - got an upgrade with a double door and a beautiful awning with space for shoes and a sink in 2022

A very simple little awning to protect the door

Gorgeous design with solar panels on top!

DIY possibilities are endless -
ask us for extra cover Vinyl material to glue on for weatherproofing if needed!
