SPECS

- Motor capacity: 600 CFM
- Controls: Touch control
- Lights: 2 X LED
- ETL approved

ACCESSORIES

- Charcoal filters included

PRODUCT PLUS

The ALBERTO is a box-design chimney hood in stainless steel. Change the desired extraction power level settings or turn the LED lights on or off with elegant glass touch-controls. An impressive extraction rate will have your kitchen odour free in no time. LED hood lighting illuminate your kitchen and helps you keep an eye on your cooking.

Light indicator for grease filter maintenance

The cooker hood automatically informs you when the metal grease filter designed for trapping grease in the air requires cleaning. It is of utmost importance to clean these filters to ensure cooker hood components are protected and to pre-vent bad odours caused by a build-up of grease.

Light indicator for charcoal filter substitution

The cooker hood automatically informs you when the active carbon filter requires replacing. This filter is designed to absorb odours produced when cooking. It is of utmost importance to replace these filters regularly as they lose their efficiency and odour trapping performance.

Time delay shut-off

This function allows you to programme delayed cooker hood shutdown which, in the shortest time possible, provides the right level of air purity in your kitchen.
