DeLonghi TrueBrew Automatic Coffee Maker with Bean Extract Technology

The DeLonghi TrueBrew is an innovative, automatic coffee machine that brews drip coffee from fresh, whole coffee beans, all at the touch of a button. TrueBrew is built to suit your coffee needs for consistent, freshly ground coffee every time. Simply pour in your favorite beans, make your selection, press the brew button, and watch TrueBrew take care of the rest. DeLonghi's proprietary Bean Extract Technology automatically grinds, doses, and brews the beans to capture the coffee's full flavor and aroma and then crafts the perfect cup for you. You can personalize your needs with 6 sizes (3, 8, 12, 16, 20, or 24-oz. cups) and 5 brew styles (Light, Gold, Bold, Espresso-Style, or Over-Ice). The Over-Ice style coffee automatically adjusts the dose and brew to create a refreshingly bold and balanced iced coffee. TrueBrew uses whole beans, not plastic pods or filters, creating zero waste. Auto-Clean functionality easily packs used coffee grounds into condensed pucks for mess-free cleanup. Plus, with a built-in clock and the Auto-On function, you can schedule your perfect cup of coffee to be ready exactly when you want it. TrueBrew combines our most precise and adaptive brewing technology with true one-touch simplicity, bringing you the purest taste possible, exactly how you like it, all at the press of a button. Transform your at-home coffee experience with TrueBrew by DeLonghi.
