Installing the Auto Tensioner Upgrade

The auto tensioner is an upgrade for the Electric Bobbin Winder which gives you effortless control and precision when winding bobbins, pirns, spools, and cones. The upgrade comes with the tensioner attached to a new bracket.

- 1) Remove the thread guide assembly from the track on the Electric Bobbin Winder.
- 2) If you have a yardage counter, remove it from the bracket.
- 3) Unscrew the two screws holding the bracket on at the front.
- 4) Remove the existing bracket and replace it with the new bracket.
- 5) Attach the new bracket with the screws included with the new tensioner.

- 6) Replace the yardage counter in the new bracket if necessary.
