

Compu-Dobby® 4.5 (CD4.5) Firmware Update Procedure

For Windows:

- Download the appropriate firmware file from the AVL website at: <u>https://avllooms.com/apps/help-center#hc-firmware-for-compu-dobby-45-little-weaver-10</u>
- Download and install AVLUtilities (this installs both the AVLUpdate and the AVLAdmin apps) from the AVL website at: <u>https://avllooms.com/collections/software/products/avl-drive-loom-control-software-for-cd</u> <u>4-or-later</u>
- 3. Turn on the CD4.5
- 4. Connect the USB cable from the CD4.5 to the computer
- 5. Open the **AVLUpdate** app
 - a. A progress window and a file selection window should appear
 - b. Select the downloaded firmware file, click Open
- 6. The file will start uploading to the CD4.5.
 - a. The progress window may say 100%, but you need to wait until you see the "update was successful" message before closing AVLUpdate (may take about 1 minute).
