technical details

FOSCARINI

Table lamp with diffused light. A collection of three diffuser shapes in hand-blown glass made using a glass-blowing procedure without turning the glass in the mould (referred to as "stationary"); the striped effect is achieved using a mould with negative decorations which are repeated across the surface of the glass, which is subsequently ground manually "by belt" and which then undergoes immersion in acid in order to emphasise the plaster-like effect. The diffuser rests on a die cast zinc alloy tripod coated with epoxy powder paint with a rough finish on the metal surface. ON/OFF switch on the transparent cable or with dimmer for the gradual brightness adjustment.
