

FIRST FOR SPECIALIST COMMUNICATIONS

Vandal and Weather Resistant Telephones

With over 30 years' knowledge and experience within the weatherproof telephone and arduous communications market, DAC are able to offer what we believe to be unrivalled advice and guidance to best suit your access and communication needs.

We strive for excellence in all aspects of our work, particularly in terms of reliability, honesty and integrity. We maintain high standards with innovative product design and investment in research and development. In recognition of the quality of our products and the way in which we deliver our services, we have been awarded a number of accreditations and qualifications including **ISO 9001**, **Link-Up** - the UK rail industry supplier qualification scheme, and **Network Rail Product Acceptance**.

Vandal and Weather Resistant Telephones

Our Products

When communication is critical

RUGGED • RELIABLE • ROBUST

With a broad spectrum of products in our ever increasing portfolio we can ensure that whatever the location and whatever the conditions, we have ways and means to keep you talking.

Vandal and weather resistant telephones are an important method of providing private and public access communications. DAC telephones are rugged, reliable and robust whilst being easy to install. Our products are manufactured to the highest quality but remain competitively priced, therefore representing excellent value for money and providing low cost of ownership.

The DAC product range is as versatile as it is extensive. Typically designed for the railways and heavy industry, our products lend themselves to a variety of situations, industries and uses that require safe and reliable communications solutions, including:

- Shipping
- RNLI Emergency Coastguard
- Road Tunnels
- Power Stations
- Retail
- Lift Emergency
- Gate Entry
- Help Points
- Car Park Security
- Fire Stations
- Police Stations
- On-Board Train Communication
- Industrial Communications

DAC also manufacture telephones to suit your needs so whether you require a handsfree, loud speaking operation or a weatherproof handset designed specifically for the toughest of conditions, speak to our team today. Our cost effective GSM range of telephones provides a reliable and effective communications terminal even when there is no supporting infrastructure. Easy and quick to install, they are designed to operate as stand-alone telephones in even the harshest environments. Completely self sufficient with an on-board battery charged via a solar panel, they are virtually maintenance-free.

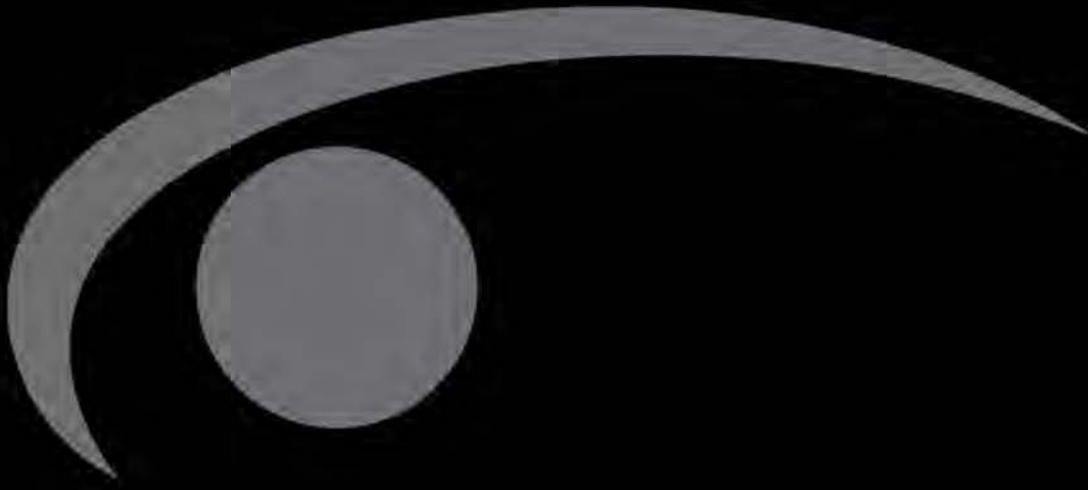

Our patented 'Tuff' handset has been designed especially to enhance the durability of existing devices that may have suffered vandalism or to offer the highest possible level of indestructibility. It is available with or without PTT functionality and with various transducer options.
