VTEch FS6726A DECT Cordless Phone with Video Doorbell

Weatherproof Video & Audio Doorbell with resistance to heat, cold and moisture, let's you securely find out who's knocking before answering the door. The wireless doorbell operates using standard AA batteries and is easy to install with no wiring required. Includes a doorbell camera with adjustable vertical and horizontal camera angles. It snaps a photo and sends it to the handsets when visitors ring the doorbell. You can then stream video, 2-way audio or both at the touch of a button from the handsets. The camera also features automatic night vision that can capture images when dark, perfect for night time and making it ideal for dim, darkened stairwells. Not at home? No worries. With the Doorbell Call Divert feature you can re-direct the visitor to an external number when they press the doorbell.
