NovaSOL®

NovaSOL® CBD by Naturecan: THE FUTURE OF CBD

The global CBD market is populated by non-scientifically proven products. It is increasingly difficult for brands to differentiate themselves in the CBD space.

Naturecan UK, and their highest quality Broad Spectrum distillate, have partnered up with the creators of the best-selling curcumin ingredient in the EU market, the German developer and manufacturer of bioavailability improved ingredients Aquanova, and their NovaSOL® technology.

Aquanova and Naturecan have created an internationally patent protected and scientifically approved technology, which relies on the nature-like micelle encapsulation structure, significantly enhancing both the efficacy, as well as the speed of action of CBD.

We are proud to present to you NovaSOL® CBD

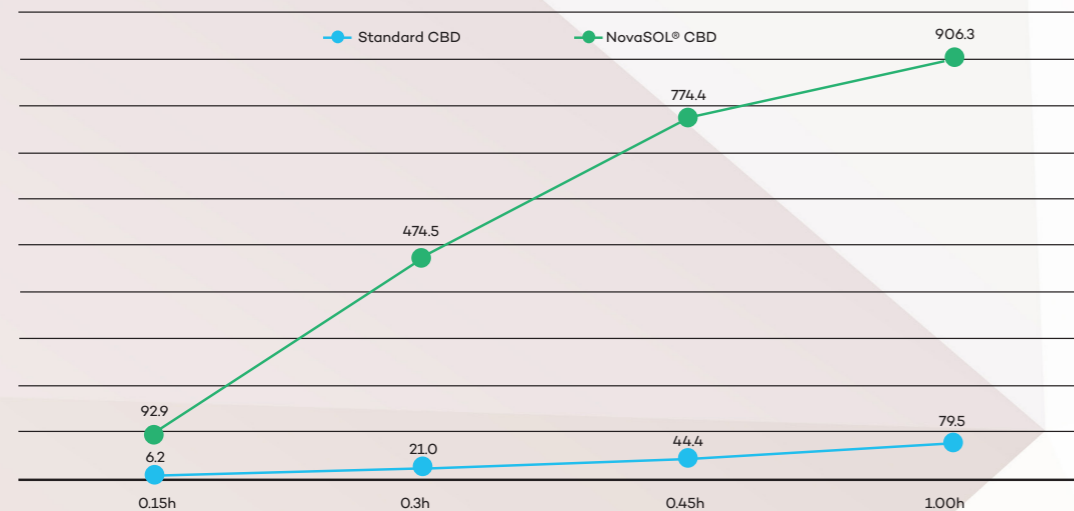

NovaSOL® CBD is super **fast**, delivering 16 times more CBD in the first hour (AUC (nmol/Lh)) vs standard CBD, giving consumers a faster effect.

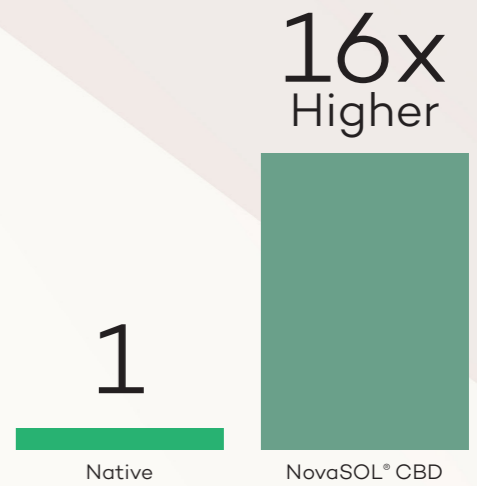

NovaSOL® CBD is super **efficient**, delivering 88% more CBD over 24 hours (AUC (nmol/Lh)) vs standard CBD, giving consumers more value for money.

CBD Average Blood Plasma Values 0-1h (ng/mL)

Bioavailability in the first hour of NovaSOL® CBD

NovaSOL® CBD offers the following advantages:

- Easily encapsulates in vegan CBD liquid filled capsules
- Liquid, water free ingredient colloids
- Nature like micelle structure
- Crystal clear water and fat solubility
- Strong clinically proven bioavailability by a renowned clinical research organization (Charles River Laboratories)
- Patent protected
- Boosting CBD efficacy
- No chemical modification
- High mechanical, thermal & pH stability

The starting material from NovaSOL® CBD is high quality CBD oil made with US grown hemp which is:

- Fully traceable to the field
- THC level is non detectable (< LOQ)
- Third Party Certified
- Every batch is tested
