2023 SPRING RETAIL CATALOG

Educational Fiber Art Crafts

Thoughtfully
Made in the USA

There's something special about teaching children to work with their hands!

Dear Friends,

We developed the first of our Friendly Loom™ Products in the 1980s in response to a growing demand from educators and parents concerned with introducing 'hands-on' creative activities to children and teenagers. Our products are designed to provide fun, challenging, educational experiences while developing concentration, fine and gross motor control, and a better understanding of spatial relationships and patterning.

In this fast-paced world where children are being forced to grow up too quickly, we believe that it is essential to help them slow things down and experience their creative abilities by introducing them to the joys of working with their hands. As educators and parents, one of our most important challenges is to encourage the development of self-esteem and self-confidence.

When a child is able to say, "I made this myself," the pride in achievement is not only felt in that child's mind and heart, it is represented in a tangible form by something beautiful and practical to own or to give as a gift. We hope that you will find Friendly Loom™ products useful tools for helping children discover the creativity that's within them.

Kind regards,

Patricia & John Colony
Founders

Introducing

Friendly Loom™ Skill Levels.

Friendly Loom products introduce children and beginners to the Fiber Arts like weaving, knitting, crocheting and felting.

Each craft has Skill Levels that guide your customers to the appropriate difficulty so that they're neither frustrated nor bored.

Each of our kits has tiered branding that identifies products for beginners (Discover), intermediate learners (Explore), and for adventurous makers (Create). In addition, each product has level 1-3 on

the box for clarity.

We hope this new approach to our products will encourage you to explore various fiber arts in the difficulty level that fits your crafting skill.

What makes us different?

Woolen yarn has been spun in the water powered, brick mill town of Harrisville since 1794. This small village is nestled in the Monadnock Highlands of southwestern New Hampshire and is the only industrial community of the early 19th Century that still survives in America in its original form. At Harrisville Designs we are keeping the textile tradition of this region alive, employing hard-working community members and making quality products. All of our products are made in the USA, and most of our products are made in New Hampshire—an idea that is a core value of our company.

Harrisville Designs Award-Winning Friendly Loom™ products are designed and made by weavers, spinners, and woodworkers. We are a small, family-owned and operated business, and we believe that quality should not be compromised for even the smallest product. You can encourage lifelong skills with our educational products (suitable for both children and adults) and give a child the best materials to work with so they can be proud of what they create.
