

User Manual

STEP 1: CONNECT AKITA™ TO THE NETWORK

- Before you start using your AKITA™, please make sure to read the End User Agreement located in the AKITA™ mobile app.
- Plug the included network cable into the YELLOW LAN port and into an open port on your router.
- Plug included power cable to the "PWR" port and into your outlet.
- Turn on the AKITA™ device using the "ON/OFF" button. It will take the device approximately 5-10 minutes to initialize with the servers.
- The front LED should begin to blink with red and/or green color. If the color is red, make sure the device is properly connected directly to your router and that no traffic is being blocked.
- For more information about connection your AKITA™ device, please refer to the AKITA™ mobile app. you can also [contact us](#) for assistance.

STEP 2: AKITA™ MOBILE APP

- Download the AKITA™ mobile app from Google Play or Apple Store by scanning the QR code located on AKITA™ box.
- Log into the mobile app to begin the setup process. Make sure you are close to your WiFi router.
- Select the SIGN UP option and enter the required information to create your Akita mobile account. There is currently no user-facing password reset option - please contact us if you need to change your password.
- Scan the QR Code at the bottom of the AKITA™ device to input your unique serial number.
- Connect to the relevant 2.4GHz WiFi network you wish to secure. Akita uses 2.4GHz to connect to your network but will monitor 5GHz devices as long as both SSIDs are on the same subnet. Akita does not currently support mesh networks.
- Wait for the activation process to complete, once finished the LED should blink green/blue. This means it is both monitoring traffic and uploading data to the servers for analysis. It will take approximately 15 minutes for Akita to detect the IoT devices on your network.
- AKITA™ will now monitor your network and detect IoT intrusion threats. Without a support subscription, you will be responsible for taking action with any devices Akita detects are compromised. If you would like a support team to handle this, please visit akita.cloud/subscription-payment and sign up for a plan.

RECOMMENDATIONS

- Unplug the power from AKITA during any severe lightning or electrical storms to prevent damage.
- Stay away from any heat source and keep well ventilated.
- Keep away from any source of water.
- Only use the relevant power adapter supplied in your AKITA™ Box.
- Place your AKITA™ on a flat smooth surface.

WHATS IN THE AKITA™ BOX
