VINYL FRAME PRODUCTS

A NEW DIMENSION IN WINDOW PERFORMANCE.

Our VINYL FRAME windows are an example of our innovation by adding a new dimension to traditional window performance. With our VINYL FRAME windows, you are not only getting a beautiful, high quality window but a window that can withstand some of the toughest weather situations and is Energy Star® rated when ordered with Low-E 366 glass. The Low-E glass provides a cooler room temperature in the summer and a warmer room temperature in the winter. **It also provides a clear view unlike tint glass and blocks 95% of the sun's damaging ultraviolet rays (a leading cause of fading), so it will help your furniture stay beautiful for years to come.**
