

Beautifully warm

Electric infrared radiant heating is practical, functional, efficient, and eco-friendly. If you're looking for a discreet heating solution that can be used both indoors and outdoors, in large open spaces or under covered areas, then look no further. Heatscope's space-saving, sleek designs are ideal for homes, restaurants, cafes, or wherever an effective, unobtrusive heating solution is needed.

Award-winning Design

Delivers pleasant heat without the distraction. Clean-cut, modern designs and colors easily blend into any decor.

Fast Heating

Noticeable heat within milliseconds and 100% heat within 15-60 seconds.

Weather-resistant

All models are certified with an IP rating for protection against dust, splash-water, and wind.

No Aggressive Red Light

Produces a very ambient, modest light based on double carbon heating elements.

High efficiency

Up to 94% of the energy used is turned into ambient heat and transferred directly to nearby people and surfaces for maximum efficiency.

Spot

Power infrared carbon heater

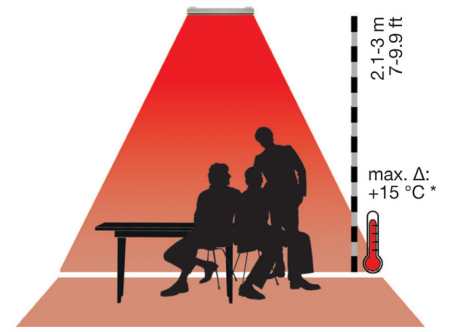

Features:

- Reduced ambient light emission
- Reaches full heat within 15 seconds
- Two heat options - 100% or 50%
- Available in white or black
- UL approved

HEATSCOPE® Spot 1600W

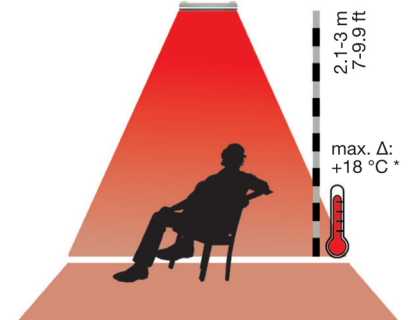

Heat Output 1600W / 5,460BTU
Size (L W H) 670 x 184 x 78 mm / 26.4 x 7.2 x 3.1 in
IP Rating IP24
Application Semi-open, well covered spaces (roof or canopy)

HEATSCOPE® Spot 2800W

Heat Output 2800W / 9,555BTU
Size (L W H) 884 x 184 x 78 mm / 34.8 x 7.2 x 3.1 in
IP Rating IP24
Application Semi-open, well covered spaces (roof or canopy)

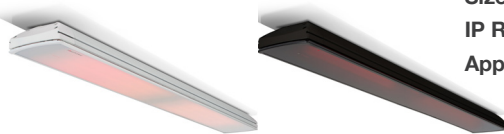

Vision

Ambient light infrared carbon heater

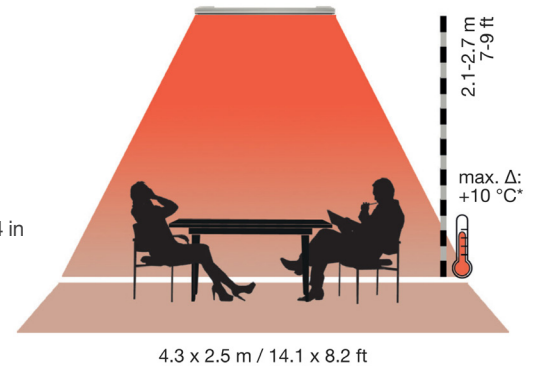

Features:

- High performance glass-ceramic front reduces light to a minimum
- Reaches full heat within 60 seconds
- Two heat options - 100% or 50%
- Available in white or black
- UL approved

HEATSCOPE® Vision 3200W

Heat Output 3200W / 10,920BTU
Size (L W H) 1660 x 184 x 87 mm / 65.4 x 7.2 x 3.4 in
IP Rating IP24
Application Semi-open, well covered spaces (roof or canopy)

Pure

Slim line ambient light infrared carbon heater

Features:

- High performance glass-ceramic front reduces light to a minimum
- Reaches full heat within 20 seconds
- Available in white or black
- Can be installed horizontally or vertically
- Award-winning design (RedDot Design Award, 2018)
- UL pending

HEATSCOPE® Pure 2400W

Heat Output 2400W / 8,190BTU
Size (L W H) 1044 x 166 x 87 mm / 41.1 x 6.5 x 3.4 in
IP Rating IP65
Application All outdoor and indoor spaces (no cover needed)
