

10 REASONS WHY RIDGELINE FIRE BOWLS ARE BETTER

1. BUILT-IN VENTS

Overheating due to improper ventilation is the #1 cause of electric burner failure. Slick Rock's Ridgeline fire bowls feature built-in vents for proper airflow and cooling.

2. FIELD SERVICEABLE FIRE UNITS

Slick Rock Concrete now offers field serviceable replacement parts. Simply unplug the worn part in your Ridgeline Fire Bowl and plug in the new one.

3. EASY INSTALLATION

Our fire units are able to be pre-assembled outside of the Ridgeline fire bowl and simply set directly onto the built-in ridge for the right fit and flame every time.

4. MADE FROM 15000PSI CONCRETE

Not only unique but strong, Slick Rock's fire bowls are proven to withstand the tests of nature and time.

5. DRASTICALLY REDUCE SHIPPING

Our Ridgeline fire bowls are designed to ship stacked. With Slick Rock, you pay to ship one and up to 19 additional fire bowls ship for free.

6. POWER OPTIONS

Slick Rock's Ridgeline fire bowls have wired or battery options available. For effortless operation, they are remote and Bluetooth compatible.

7. PRE-APPROVED LISTED FIRE APPLIANCE

Slick Rock is ahead of the curve in preparations for the upcoming appliance regulation mandating that not only the fire burner be listed, but the combination of fire burner and bowl be listed as an appliance.

8. HIGH HEAT RESISTANT CONCRETE

Slick Rock's Ridgeline fire bowls are cast with premium concrete to endure elevated temperatures on a daily basis.

9. MORE COLOR OPTIONS

From essential colors like gray and buff to more vivid tones like adobe and copper, you have a wide variety of colors to choose from for the luxurious finish of your fire bowl.

10. EASY TO USE ORDER FORM

Not only can you order your new Ridgeline fire bowl with our user-friendly online order form, but Slick Rock now has a convenient order desk order form from which you can place your order. This order form walks you through everything you need and is all-inclusive of our products!
