

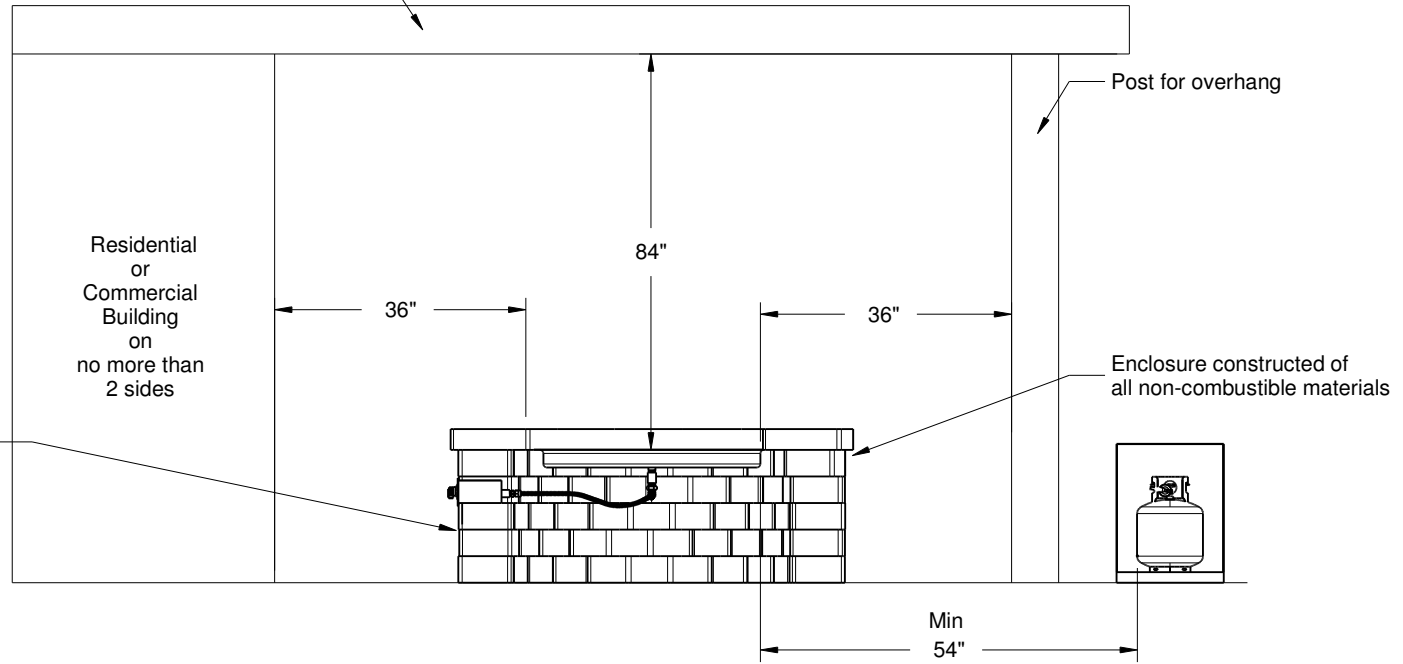

Figure 1 - up to 100,000 BTU : LP Tank For Outdoor Use Only - Select models only

REVISIONS				
ZONE	REV	DESCRIPTION	DATE	APPROVED

Overhead structure to include:
(roof, overhang, pergola, or screen)
for products up to 100,000 BTU.

Ceilings shaped like a gazebo must have a minimum of 150 square inches of roof vent to allow heat to escape.

For wall or ceiling screen 50% free air space is recommended. HPC is not responsible for screen that melts.

Diagram illustrates common clearance questions. * Clearance from overhead structure * Clearance from structure/combustible * Deck installation All items may or may not apply to your project.	DRAWN	DATE	Clearance's - Fire Pit up to 100K BTU's for LP Tank
