

# Getting back to basics.

Despite the challenges we've had to overcome, the past two years have been an opportunity to learn, reevaluate and reaffirm our strengths and core beliefs. Now is the time to get back to the basics, and we can't wait for you to see everything we have in store for 2022.

This all started with the launch of a new brand campaign: Basic Is. Basic is a blank, clean canvas, the perfect platform for a new idea and an indispensable tool for self-expression. It's our belief that the basics — like quality, consistency and reliability — deserve more attention than they usually get. At Gildan®, we treat basic with the respect it deserves.

To elevate the Gildan® Softstyle™ collection even further, we've added 4 new styles and 9 new colours. These styles are being incorporated from our sister brand ANVIL® by Gildan®, allowing us to consolidate and simplify our core Gildan® offering.

Gildan® continues to have your back and we remain committed to Making Apparel Better™, not only with regard to the quality of our garments but also how they are made.

# Creating the change we want to see.

## Responsibility in every stitch.

So much goes into our products beyond cloth and dye — our beliefs, our values and our drive to Making Apparel Better™. We're committed to being sustainable, ethical and transparent about our practice, because while we fabricate many products, we never fabricate the truth behind how they're made.

## Conserving the environment.

Quality. Price. Impact. All in equal measure.

- We've been recognised with several awards for our sustainability efforts. We are one of only three apparel companies on the Wall Street Journal® Top 100 Most Sustainably Managed Companies and we have made the Dow Jones® Sustainability Index for 8 years running.
- We source our fibers responsibly and sustainably.
- We innovate and develop technologies to reduce our use of water and energy to lower our impact on the planet.

## Caring for our people.

Our people first, and foremost.

- Because we own and operate our own factories, we're able to offer all our employees fair wages and empowering and safe workplaces.
- We also offer competitive benefits like subsidized meals, free transportation, and in some of our facilities we have free on-site medical clinics for our people.

## Creating stronger communities.

What we make matters as much as where we make it.

- We create economic development opportunities in the regions we operate.
- We invest in local organisations and projects to help our communities prosper.

# Decorator's Techniques

## HEAT TRANSFER

Heat transfer involves combining heat and pressure to transfer images to garments. This is a great option for detailed prints, customisation, shorter runs and quick turnaround times.

## DIRECT TO GARMENT

Direct to garment printing (DTG) is printing on textiles using inkjet technology which usually utilizes specialised water-based inks. DTG is particularly effective for short runs, full color printing, or for reproducing fine detail.

## EMBROIDERY

Embroidery is sewing a design, type or logo onto a garment with special thread. This technique gives garments a higher perceived value and works particularly well on heavier weight garments such as fleece.

## SCREEN PRINT

Screen printing (or silk screening) is a technique that uses stencils and ink to create designs on garments. It is the most economical method for producing large quantities that involve cotton or cotton-blend garments.

## SUBLIMATION

Also called dye sublimation, this process uses heat-sensitive inks to create full-color, photo-quality reproductions of digital images that last. Sublimation is well suited for 100% polyester garments.
