characteristics

Colour and textural differences are expected to occur through the life of the rug, due to the unique qualities of Jute and over-dying of the yarn.

This is a characteristic of Egyptian. A 'worn-in' look is expected as you would find with a good pair of jeans. This will not affect the quality of the rug.

delivery time for custom sizes

- Approx. 16 – 20 weeks (non-monsoon, October-May)
- Approx. 18 – 22 weeks (monsoon, June-September)

Please note due to the demand of this design, product may not always be in stock, above lead times apply.

manufacturing variations

Size - Can vary by +/- 3%.

Colour - Rugs are primarily made from natural and undyed fibres. Every effort is made to ensure there is minimal colour variation however some variation can be expected. Jute exhibits nuances in shading that enhance its natural beauty, resulting in gentle linear variations when it is overdyed to achieve depth in colour. The pile has a clear, one-way direction that refracts the light beautifully, causing the colour to change subtly when viewed from different angles.

Shedding - Natural fibre rugs will initially shed loose fibres, which can be hastened by regular vacuuming.

Pop-ups - Due to the nature of weaving, there will be short fibres popping up while the rug settles. These can be trimmed.

Care Instructions - Please refer to our website for rug care instructions: armadillo-co.com/care-and-maintenance/
