THE POWER OF THE SUN IN THE PALM OF YOUR HAND
HybridLight® is a pioneer of solar powered mobile lighting and charging solutions designed for when you need the power of the sun to shed light on all of your adventures. Our portable flashlights, lanterns, headlamps, and power panels, are the reliable go-to illuminator that you want in every toolbox, glovebox, emergency kit, nightstand, and kitchen drawer.

The HybridLight® line offers lighting and charging products with minimal expense to earth’s resources and huge cost savings while providing dependable light when and where you need it – every time! Perfect for recreational, occupational, and everyday use that encourage emergency preparedness and help protect our environment.

**DURABLE, ENVIRONMENTALLY FRIENDLY AND GUARANTEED FOR LIFE.**

The HybridLight® family of innovative lighting solutions use revolutionary energy technology that generates power from natural sunlight or any indoor light source and stores it for future use. When fully charged, HybridLight® products can hold a charge for years and offer light where and when you need it.

Rechargeable again and again, HybridLight® products pay for themselves quickly and will soon become your favorite lighting and charging source.

Back in 2006, Terry Peterson began working on his vision for the portable solar hybrid technology that would be dependable and affordable without concern for dead batteries. This technology would then develop into a series of products that are fully rechargeable and more importantly tailored to charge phones, tablets, or anything with a USB with optimal efficiency.
