HEX

**BLUETOOTH SPEAKER /
400 LUMEN HYBRID SOLAR
LIGHT & CHARGER**

Read instructions prior to use. Refer to the instructions regarding any questions about the use of your HEX Bluetooth Speaker.

USING YOUR HEX Bluetooth Speaker

Operating Your Light

Pressing the On/Off button will operate between different lighting levels.

- Low Area light (40 lumens, 60 hours of light)
- High Area light (400 lumens, 8 hours of light)
- Hold the light button to adjust brightness of the area light.
- 10hrs. on Flashlight mode
- Hold for 2 seconds to enable strobe lighting

Charging your Speaker

When the speaker is charging, by either solar or USB, the charging indicator will show a red light. The indicator will shine brighter with a stronger charge. When the device is fully charged, a green light indicator will show. The green light indicator will not show when charging by light. After initially removing the product from its packaging, charge it fully with direct power before using the solar charger. Leaving your speaker charging for extended periods of time will not harm the rechargeable cell.

There are two ways to charge your speaker:

1. Micro USB port: Lift up the rubber guard and insert the micro USB cable into the port, insert other end into any standard USB charger or suitable USB wall outlet. Typically 3 hours of charge time is needed to fully charge the device from a standard wall outlet if the speaker is completely drained.
2. Solar panel charge: Position solar panel into the brightest sunlight (or other lighting) possible, with direct light on as much of the panel as possible. Typically charges full in 10 hours of time depending upon brightness and intensity of light source, if the speaker is completely drained.

Using Bluetooth: Pairing your Device:

Turn on Bluetooth capability on your device and make it discoverable (see your device's instructions to add or set up a Bluetooth device). Then turn on the HEX by holding down the **U** button. You should hear a start-up sound. Press the "Mode" Button until you hear "Bluetooth". Go to your device and pair with the device name "HybridLight". Once paired, the flashing blue light will turn solid blue. Press and hold **U** to turn off device.

When Playing Audio:

- Press the **⏮/⏭** to navigate your music or radio stations.
- Press and hold **V+/V-** to adjust volume

Playing via AUX:

Connect the 3.5mm audio plug to the headphone or line-out jack on your audio device, and plug the other end into the HEX AUX port (small hole on the side). Power on HEX and press the "Mode" button until you hear Auxiliary. Your device's audio will now be playing through the HEX.

Using FM Radio:

- Turn on your device and press "Mode" until you hear "FM"
- Press **⏮/⏭** to find your desired station.

Using Micro SD Card:

Insert your Micro SD card into the Micro SD slot. Turn on the HEX and press "Mode" until it says "Micro SD". Navigate and adjust as normal.

Charging Mobile Devices using the HEX:

Lift rubber guard that houses the Micro USB and USB ports. Plug the cable into the USB port, and the other end into a compatible device. This product will not charge a device when the speaker's battery is lower than 20%, in order to reserve power for the speaker/light.

PRODUCT WARNINGS

Do not use if broken, bent, cracked or damaged parts are present. Any light that appears damaged in any way or operates abnormally must be removed from service. Inspect before each use.

- Do not disassemble the Bluetooth Speaker.
- Do not operate the Bluetooth Speaker near fire, flammable liquids or in gaseous or explosive atmospheres.
- Do not permit children to use the Bluetooth Speaker unsupervised.
- Do not shine directly into eyes.
- Unplug unit before attempting any cleaning or maintenance.
