## INSTRUCTIONS:

### Mount Amplifiers Before You Install the Amp Mount

**Step 1:** Make sure your steering wheel is in the lowest position.

**Step 2:** Remove the 7 torx bit bolts (T30) on the driver side dash panel behind the gauge cluster.

**Step 3:** Remove the 2 torx bit bolts directly in front of the shifter knob.

**Step 4:** Remove the 3 speed clips on the dash. One speed clip is located underneath the dash next to the gauge cluster. (See picture for reference)

**Step 5:** Gently pull off cover of the location where the fuse box is located. Remove 2 torx bolts inside.

**Step 6:** Slide amp mount into position. (Reference pictures for mounting position)

**Step 7:** Make hole on the amp mount is placed around the stock bolt. (Reference picture)

**Step 8:** Line up mounting holes with lower crossbar and screw in self tappers.
