DIAGNOSTIC LIMITATIONS WARNING

Although TEXA strives to keep its diagnostic tools up to date, it ever more often finds itself having to deal with very complex modern vehicle electronics that requires tools with advanced technological features.

For this reason, the diagnosis or some specific functions are not compatible on some vehicles. The tools that are subject to these limitations are the following:

- NAVIGATOR TXB with a black or PGDS label (S/Ns that start with "DNX" or "W").
- Navigator TXM with a black label (S/Ns that start with "DNA").
- NAVIGATOR TXT with a black label (S/Ns that start with "DNT" or "W").

In order to make it easier on our customers to switch to a "new generation" TEXA diagnostic tool, that will guarantee top performance in carrying out your daily work within the workshop, TEXA has set up a special scrappage program that will allow you to purchase new diagnostic solutions at an extremely affordable price.

N.B.: The diagnosis on the makes BENELLI, BENELLI (DSK), BIMOTA and on the models APRILIA MXV, RXV, SXV and the Racing reprogramming function for the SUZUKI, CAGIVA and KAWASAKI vehicles are not available with the Navigator Nano S interface.

Good luck with your work!
