

**2024 Ford Mustang
Plate Mount for RTR Grille
For European vehicle registra-
tion plate
(520 mm x 110 mm)
Part Number 11011.0013.12.A**

Components Included

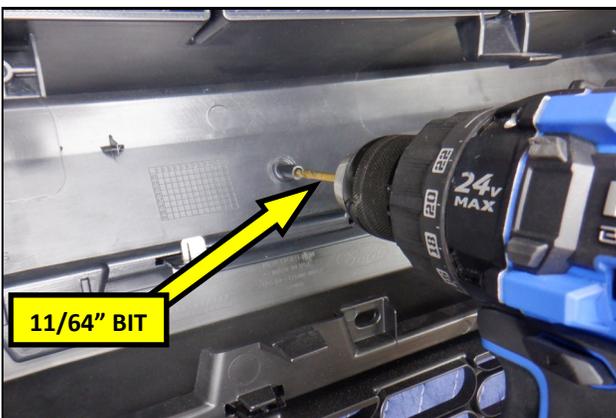

1.	Base Plate	1
2.	Plate Frame	1
3.	Hardware Pack	1
4.	Instruction Scan Card	1

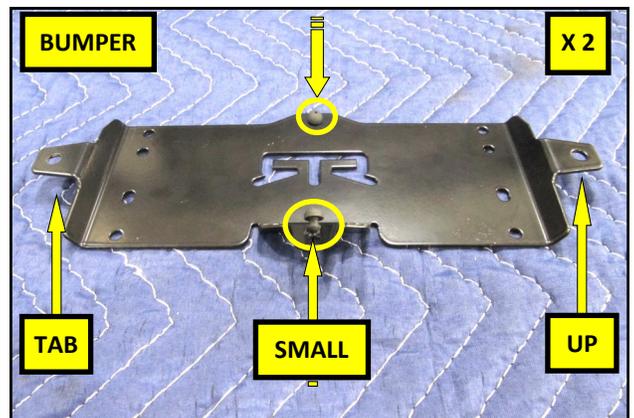

1. Place the bumper cover with the RTR Grille installed face down onto a padded work surface.

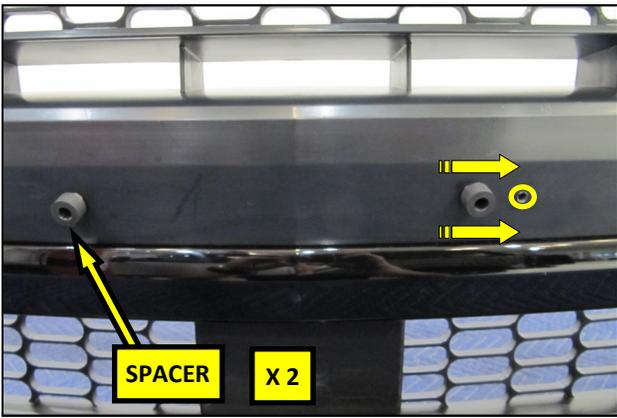

2. Locate the two Screw Bosses in the center of the RTR Grille.

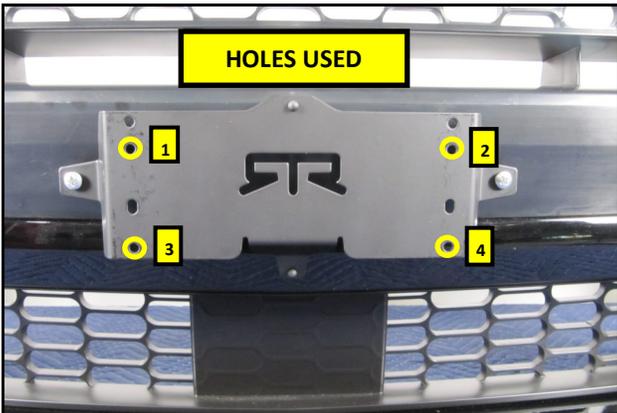

3. Using the Screw Bosses as guides, drill through the RTR Grille using an 11/64" bit.

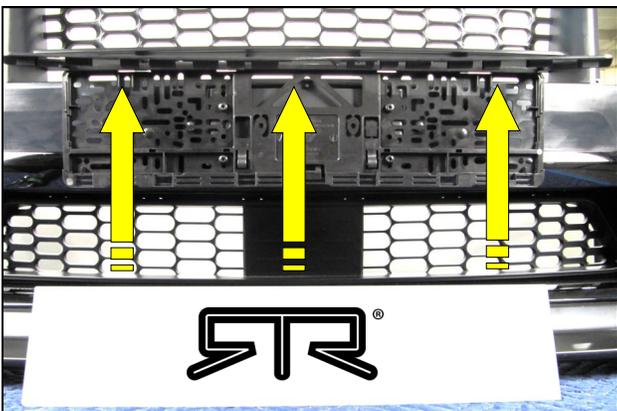

4. Place the Base Plate on a padded work surface as shown, with the mounting tabs raised. Carefully insert the Rubber Bumpers into the Mount, small side first.

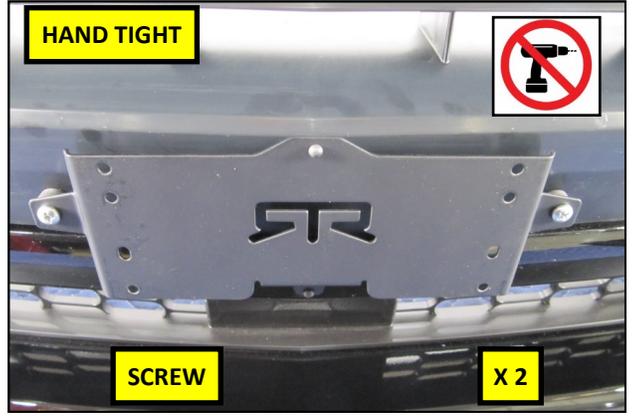

5. Place the rubber Spacers over the holes in the front of the bumper cover made in step 3 and align the holes.

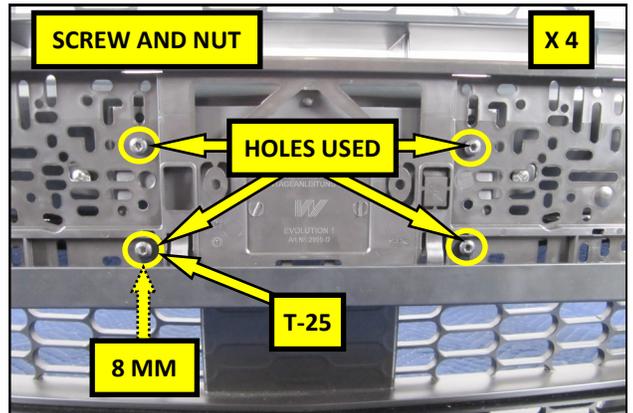

7. The Plate Frame is to be secured to the Base Plate using the holes indicated in the photo above.

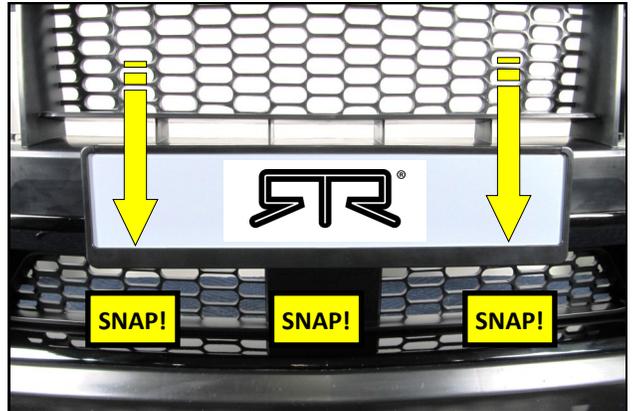

9. Open the hinged Plate Frame and slide the registration plate into the Frame.

6. Using the Large Phillips Head Screws, secure the mount to the bumper cover, as shown. Tighten the screws until the Bumpers from step 4 come in contact with the bumper cover. Tighten by hand to avoid damaging the cover.

8. Using a T-25 TORX® driver and a 8 mm wrench, secure the Plate Mount to the Base Plate with the 5 mm Screws and Lock Nuts. Note the 4 holes used to mount the frame in the photo above.

10. Close the Frame over the plate and snap the Frame shut. Verify the frame if fully closed and that the plate is secure within it.
Continue on to step 26 in the Upper Grille install Manual.
