

Dial Hanger

Dial Hangers can be mixed and matched in various colours, quantities, layouts and can be purchased with or without the extension hook. They are made from powder coated stainless steel so are ideal for wet areas or to hang things outdoors.

Designers

Nicholas Karlovasitis and Sarah Gibson

Year

2012

Materials

Powder coated aluminium & stainless steel. Dial Hanger is waterproof and holds up to 20kg, depending on wall and screw.

Designers

Nicholas Karlovasitis and Sarah Gibson met whilst studying at university and formed DesignByThem in late 2006. Since establishing DesignByThem they have gone on to work with a diverse range of clients and have produced numerous designs characterised by their innovative use of materials, sustainable practices and ability to combine a sense of fun with clear function.

Designers' Notes

"We wanted to create a fun organisation tool that could be personalised to suit peoples various belongings and environments," says designer Sarah, "The colour circles help unify the space while the hooks are great for hanging smaller objects."

Sustainability

Steel is highly recyclable. There is minimum waste generated during the manufacture of this product, with off cuts being recycled.

DesignByThem offers a product stewardship program where they will take back products at the end of their life to either recycle or repair if damaged.

DesignByThem

DesignByThem is a Sydney based design brand that brings together and represents the talent of Australian designers through a collection of innovative products and projects.

All products are designed and made in Australia and are embedded with environmentally sustainable practices.

Instructions

Please read all instructions before starting to assemble the coat stand.

1: If installing the Dial Hanger into a masonry/brick or plasterboard, first install a wall plug as per its instructions at the desired hanger height. You can buy wall plugs from most hardware stores.

If installing the Dial Hanger into timber, drill a pilot hole into the wall at the desired hanger height.

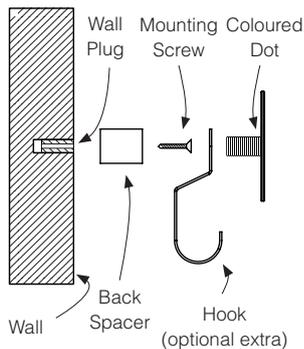

2: Unscrew/remove white wall spacer from back of coloured dot.

3: Screw the white wall spacer directly into the wall plug or pilot hole, until secure.

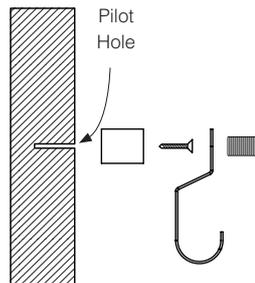

4: Proceed to screw the coloured dot onto the wall spacer until securely fastened. If you have the hook attachment for your Dial Hanger, attach it between the wall spacer and the coloured dot.

The Dial Hanger is now ready to use.
