

RPM Pizza, LLC

Enterprise Roll-out of 170+ Locations

Two years after installing their first stores, RPM executives installed Tune® devices enterprise-wide. In the fall of 2020, Tune® was installed in 170 existing stores and is being added to new locations during construction. Based on the analysis of earlier installations, **RPM anticipates a return on investment in less than two years (1.7) and enterprise-wide savings of more than \$100,000 annually.**

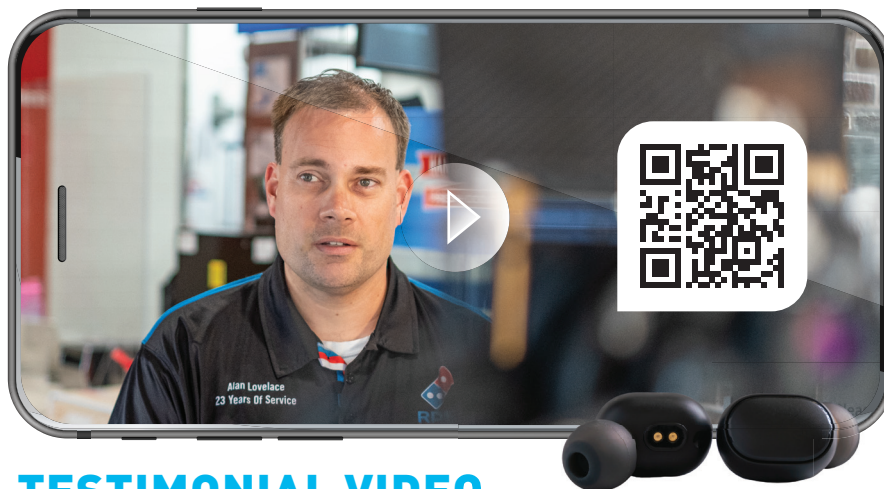

When first introduced to Tune®, RPM executives were skeptical but intrigued. They each installed Tune® in their homes, and after 12 months, they all reported savings of 10% or more. Given the savings in their homes, Tune® was installed in select stores, and results were measured for the following 12 months.
