Invacare® IVC™ Manual Wheelchair Series

Yes, you can.™

For more than 20 years, Invacare has set the standard in manual wheelchairs for the HME industry. But our customers asked us to raise that standard to even greater heights. We listened and said, “Yes, we can build an even better manual wheelchair.”

As a result, Invacare has developed a totally new line of manual wheelchairs – the Invacare® IVC™ Manual Wheelchair Series, focusing on **I**nterchangeability, **V**alue and **C**omplexity Reduction:

- IVC Manual Wheelchairs are Interchangeable and compatible throughout the entire current line of wheelchairs. In addition, these chairs offer interchangeability with the Tracer® and 9000 series too.
- The IVC line provides increased Value, with more features, more options, and more functionality, all at a better price.
- At the same time, providers asked us to make the line simple and easy to understand. We listened and responded. The new IVC wheelchairs represent a conscious effort at Complexity Reduction – consolidating 18 different frames down to 10 frames, covering seven different Medicare codes. Fewer models make it easier to make the right choice for each consumer without sacrificing the features and benefits that make the chair a perfect fit for each consumer.

In addition, we have responded to your feedback with a new “no tools adjustment” front-rigging design, a new permanent arm design, a reclining-back kit and much more.

The new disk wheel lock is designed to provide longer wear and greater durability. This new patent pending design will reduce maintenance and service repair associated with the old bolted assembly.

Invacare has expended considerable resources in researching and designing the IVC line; however, what we didn’t do was check with all those off-brand, imported chairs to see if our new line will be interchangeable with them. So why take a chance? Stick with the industry leader: Invacare.

Bariatric/Heavy-Duty Designation

Invacare products with the Bariatric/Heavy-Duty icon are designed for your bariatric patients whose height and weight require the use of a heavy-duty model. These products provide the same quality that all Invacare products possess. They also demonstrate our commitment to this product category.

Invacare® IVC™ Tracer® EX2 Wheelchair

The Invacare IVC Tracer EX2 wheelchair sets the new standard in manual wheelchairs. The Tracer EX2 combines the design and technology of the Invacare 9000 series and incorporates it into the Invacare Tracer series. A true dual axle position allows for repositioning the 24" rear wheels and 8" casters for adult and hemi seat-to-floor heights. Offset permanent arms offer full seat width up to 20" with a permanent arm, hemi spaced footrest, full range of accessories and a limited lifetime warranty. The new design also makes it possible to interchange components with the 9000 series chairs.

FEATURES

- Durable, low-maintenance, triple chrome-plated, carbon steel frame is long-lasting
- Dual axle positions allow variation of seat-to-floor heights
- Offset permanent arms available in 16", 18" and 20" widths
- 14-gauge crossbraces add strength and durability
- Urethane rear tires mounted on "no flex" wheels offer superior performance
- Low-maintenance, dual-sealed precision bearings
- Heavy-duty inner liners keep seat and back from stretching
- Flame-retardant upholstery resists mildew and bacteria, as well as cold-crack and UV damage
- Upholstery is dual-embossed
- Meets RESNA standards for manual wheelchairs in product performance
