

Model: 55/4705

Mattress		Pump	
Mattress Type:	Cell Type (Full Piece)	Dimension:	L237 x W112 x H95 mm
Dimensions:	L200 x W85cm	Voltage:	230V
Height:	5" (12.7cm) with Heel Slope of 3.5" (9cm)	Weight:	1.2kg
Material:	Nylon + 0.2mm TPU Film	Air Output:	8 litre/min \pm 10%
No. of Cells:	16	Pressure Range:	40 ~ 90mm/Hg
Cover Material:	Ny70D / 0.015 TPO Film	Cycle Time:	9.6min/60Hz
Function:	Alternating	Alternating Mode:	2 sections
		Weight Capacity Range:	30 - 120kg

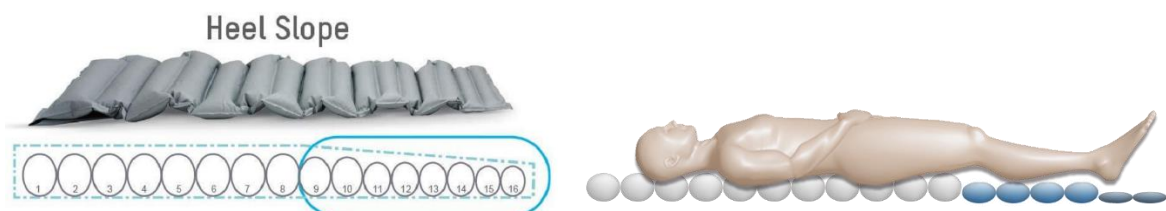

Adjustable hangers suitable for most bed end panels

Weight indicator reference to facilitate optimized pressure setting

Extension flaps can be tucked under the standard mattress for stabilisation

Heel slope (to relief pressure on the heels) all pad to fill in the Achilles tendons so that pressure are distributed over the entire lower legs

Vapor permeable and water resistant with basic flame retardant level.

Water Resistance

Flame Resistance

Biocompatibility

Vapour Permeable

Features

- Alternating function
- Easy to use system to provide effective support
- 5" height with heel slop for better heel pressure relief
- 1-piece mattress overlay
- Cost effective mean for low to medium risk of developing pressure ulcers
- Low energy consumption
