

**Model No: 42/9015**

This Power Assist Pack will turn most manual wheelchairs into attendant controlled electric wheelchairs. It allows caregivers or helpers push the chairs easily, especially if the patient is heavy and the helper is also not strong enough to push.

**Features**

- Allows speed of up to 6.4 km/h
- Travels up to 16 km on a full battery charge
- Max Load Capacity: 136kg
- Weight: Approximate 30kg
- After the brackets are installed, the Power Assist Pack can easily be fitted or removed within seconds
- Push and slide battery removal system
- Portable thus making transportation simple
- Fits most standard wheelchairs between 16" to 20" seat width
- Simple to manoeuvre and reverse
- It has a powerful 150 watt, 24V motor, capable of coping with most terrains
- 15AH valve regulated sealed lead acid battery pack
- 2A charger as standard for off-board charging
