

Q50 R[®] Carbon

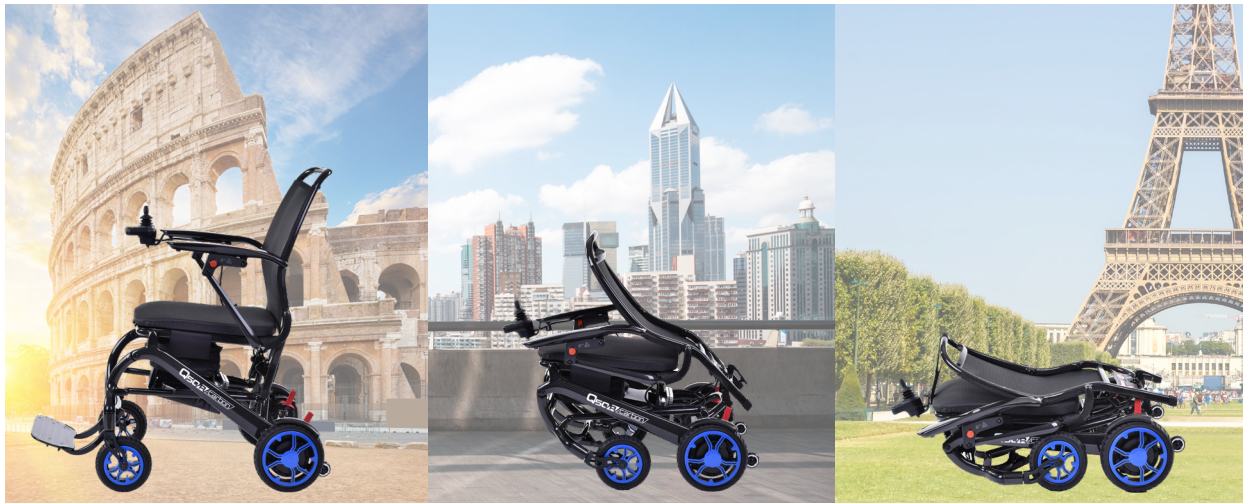

Experience The Joy Of Light Travelling

Q50 R CARBON

One Of The World's Lightest Carbon Fibre Folding Powerwheelchair

Next stop, dream destination. Experience the joy of travelling with one of the **lightest foldable Carbon fiber power wheelchair in the market.** 14.5 kg (without battery) only and a super smooth folding mechanisms - you don't even need to remove the battery. With the smart folding fixation and the practical small, folded package, lifting and storing in one piece becomes more than easy. One of the world's best nVR2 Brushless Controller allows for precision on maneuvering in tight spaces. How easy is it to get from A to B?

1. Undo the clip at the back of the chair

2. Fold up the footplate

3. Push the backrest downwards to fold

no. **1** controller in the market (P&G)

2 x distance (dual battery)

3 step folding

14.5 kg lifting-weight*

*without battery

DUAL BATTERY - NEVER RUNS OUT

Afraid that the battery isn't as eager to cover a long distance as you are? Don't worry! Thanks to the integrated battery compartment, **a second battery can be taken along** and replaced with the empty one when needed. Your Q50 R Carbon keeps going, and going...incredible **24 km!**

LIGHTWEIGHT, YET STABLE

We've been designing powerchairs for over 40 years, **testing them beyond industry standards**, working alongside world-class manufacturers to deliver solidly built powerchairs that have the very-best driving performance that others just can't match. For the Q50 R Carbon we use **Carbon and Magnesium: the lightest but strongest materials** which ends up in a **very low weight yet high-performance power wheelchair**.

COLORS

Stylenastic! With its elegant black carbon-fiber frame, the Q50 R Carbon is a real eye-catcher. Sting even more out of the crowd with a selection of **5 accent colors!**

CONTROLLER

With its narrow width, small caster wheels and tiny turning circle, the Q50 R Carbon is a true space-saving wonder - not only easy to stow when folded, but also super manoeuvrable in tight spaces. The nVR2 Brushless Controller by the world-leading Curtiss-Wright Corporation is **intuitive to use and allow for precise control** in any tough situation.

STOP LIGHT

When it comes to **protection and visibility** in the dark, the extremely bright and stylish looking QUICKIE stop light is unbeatable.

TURNING CIRCLE

The Q50 R Carbon has a small 1220 mm turning circle, making it **ideal for narrow spaces** without the need for complicated manoeuvres.

Q50 R Carbon

Technical Data*

Maximum Load Capacity	136 kg
Overall dimensions (L*W*H)	923 mm*570 mm*928 mm
Folded Length (L*W*H)	370 mm*570 mm*767 mm
Driving Range	12 km [one battery] 24 km with optional additional battery
Seat Depth	420 mm
Seat Width	440 mm
Back Height	464 mm
Drive wheels	Diameter Front 165 mm / Diameter Rear 210 mm
Max. speed	6 km/h
Battery size	24V/10Ah (Li Battery, with additional battery storage)
Electronics	Curtiss Wright nVR2 Brushless Controller
Motor	High power 250W brushless motor
Max. kerb climbing	40 mm
Transport without user	Fix the wheelchair safe in the vehicle (e.g. car or plane).
Intended use & environment	For people with limited mobility, indoor and outdoor use. Wheelchair type class A

* Exact measurements may vary depending on options.
