Nakie Hammock

What is included

HAMMOCK BAG

2X STRAPS

2X CARABINER

How to set it up

1 Wrap the Strap around the tree and loop it through the one side.

2 Do the same on the other tree.

3 Clip the Carabiner on the Loop from the strap.

4 Unravel the hammock.

5 Clip the Carabiner on the Loop from the strap on the other side.

6 Hammock set up complete.

Nakie Picnic Blanket

How to roll it up

1 Start by laying the picnic blanket flat on the ground, with the pattern facing down.

2 Fold the blanket in half, bringing one edge to meet the other.

3 Fold it in half again, neatly aligning the edges for a compact fold.

4 Fold the blanket once along its long axis, creating a narrower shape.

5 Fold it once more along the same axis, further reducing the size.

6 Roll the folded blanket from one end to the other.

7 Use the clips to secure the rolled blanket in place which has adjustable straps.

Nakie Beach Towel

How to roll it up

1 Grab your towel lengthwise and fold it in half.

4 Fold it in half one last time, so it's nice and small.

2 Fold it in half again.

5 Then just fold it in thirds.

3 Once more, always making the biggest side smaller.

6 Finally, place it straight back into the bag.

Nakie Bug Net

What is included

BUG NET

1X TOP LINE

How to set it up

1 Begin by inserting your hand through the designated opening on one side of the bug net.

2 Guide the bug net through the hammock, ensuring it envelops the entire hammock securely.

3 Tighten the loops on both ends of the bug net.

4 Wrap the top line around the tree and back through the Line Locker. Make sure to pull it tight.

5 Begin on one side and use all the clips to attach the bugnet to the top line.

6 Unzip the bugnet, climb into your hammock, and relax.

Nakie 3m x 3m Waterproof Tarp

This diagram serves as a visual reference to help you understand the consistent terminology used in the guide.

- 1 Middle Apex
- 2 Quarter Apexes
- 3 Diagonal Apexes
- 4 Tie-out Loop
- 5 Corner

Nakie Line Locker

How it works

1 Feed the line underneath, through the back hole of the line locker.

3 Pull tight and the line locker will secure the line.

2 Pull the line and feed it through the top front hole.

A-Frame

HOW TO SET UP:

- 1 Take the all-black rope, the ridgeline, and loop it around both sides of the tree.
- 2 Throw the tarp over the hammock or bugnet.
- 3 Feed the ridgeline through the no-knot line locker (refer to page 8), grab the remaining part of the ridgeline, and thread it through the eyelets along the middle apex of the tarp.
- 4 Loop it around the other tree and pass it back through the line locker, pulling tightly to secure.
- 5 Secure the black and white rope to the line locker on the corner of the tarp. Connect the rope to each peg with the line locker.
- 6 Push the pegs into the ground and adjust the tension of the rope using the line locker as needed.

Refer to page 8 for detailed instructions on using the line locker

Lean-To

HOW TO SET UP:

- 1** Take the all-black rope, the ridgeline, and loop it around both sides of the tree.
- 2** Feed the ridgeline through the no-knot line locker (refer to page 8).
- 3** Grab the remaining part of the ridgeline and thread it through the eyelets along the quarter apex of the tarp.
- 4** Loop it around the other tree and pass it back through the line locker, pulling tightly to secure.
- 5** Secure the black and white rope to the line locker on the front two corners of the tarp. Connect the rope to two pegs with the line locker and secure the front two corners.
- 6** Peg down the back two corners if required.

Stealth Shelter

HOW TO SET UP:

- 1** Take the all-black rope, the ridgeline, and loop it around both sides of the tree at hip-height.
- 2** Feed the ridgeline through the no-knot line locker (refer to page 8).
- 3** Grab the remaining part of the ridgeline, and thread it through the 3 middle tie-out loops on the tarp edge.
- 4** Loop it around the other tree and pass it back through the line locker, pulling tightly to secure.
- 5** Fold the tarp at the middle apex, neatly tucking the extra material underneath the shelter. Secure the three tie-out loops along the middle apex with pegs. This will create your groundsheet.
- 6** Peg down the edge loops on the suspended quarter apex. Then peg down the front two corners.

Plough Point

HOW TO SET UP:

- 1** Above head-height, loop the ridgeline (all black rope) around the tree and back through the line locker.
- 2** Pull the opposite tarp corner out and peg down the second edge loops.
- 3** Pull the other corners to the left and right and secure with pegs.
- 4** Great way to set up the tarp for protection with only one tree.

Diamond

HOW TO SET UP:

- 1** At head-height take the all-black rope, the ridgeline, and loop it around both sides of the tree.
- 2** Feed the ridgeline through the no-knot line locker (refer to page 8).
- 3** Grab the remaining part of the ridge-line, and thread it through the eyelets along the diagonal apex of the tarp.
- 4** Loop it around the other tree and pass it back through the line locker, pulling tightly to secure.
- 5** Secure the black and white rope to the line locker on the 2 hanging corners of the tarp. Connect the rope to each peg with the line locker.
- 6** Push the pegs into the ground and adjust the tension of the rope using the line locker as needed.

C-Fly

HOW TO SET UP:

- 1** At chest-height take the all-black rope, the ridgeline, and loop it around both sides of the tree
- 2** Feed the ridgeline through the no-knot line locker (refer to page 8).
- 3** Grab the remaining part of the ridge-line, and thread it through the eyelets along the quarter apex of the tarp.
- 4** Loop it around the other tree and pass it back through the line locker, pulling tightly to secure.
- 5** Fold the tarp along the quarter apex that is nearest to the ground, tucking the extra material beneath the shelter to create a groundsheet.
- 6** Peg down the groundsheet corners
- 7** Secure the black and white rope to the line locker on the 2 top corners of the tarp. Connect the rope to each peg with the line locker.
- 8** Push the pegs into the ground and adjust the tension of the rope using the line locker as needed.

Bivy

HOW TO SET UP:

- 1** At chest-height, loop the ridgeline (all black rope) around the tree and back through the line locker.
- 2** Pull the opposite tarp corner out and peg down.
- 3** Grab the 3rd tie out loop on the right side and peg it to the ground. Do the same on the other side.
- 4** This will result in a triangles piece on either side of the shelter. Tuck them beneath the tarp to create your groundsheet.

Full Lean

HOW TO SET UP:

- 1** At head height, take the all-black rope, the ridgeline, and loop it around both sides of the tree.
- 2** Feed the ridgeline through the no-knot line locker (refer to page 8).
- 3** Grab the remaining part of the ridged-line and thread it through the eyelets along the edge of the tarp.
- 4** Loop it around the other tree and pass it back through the line locker, pulling tightly to secure.
- 5** Peg down each corner and add additional pegs in the middle if needed.
