## RING SIZING GUIDE

Use our guide to ensure the ring you are buying will fit you the way it should. Follow the steps below to help prevent a broken heart.

Print this guide at 100% scale. The line below should be 50mm wide. If it is not, reprint this guide and ensure 'page scaling' is set to none.

1. Take an existing closed ring that you own, and place it on the chart below, ensuring that the black line remains visible. For best accuracy use a ring from the finger you intend to wear it on, similar to the style that you intend to buy.
2. Find the size that best matches your ring.
3. Repeat the procedure with a second ring, just to be sure. If the ring sits between two sizes, you should purchase the larger size.
