

## CleanLeaf CL3000-C20 2800 ACFM Media Filtration System

The CleanLeaf CL-3000 high-capacity series was engineered to capture multiple airborne contaminants, including thick smoke, in indoor cigar shops, hookah lounges, taverns, grow rooms and dispensaries.

Smoke haze, bacteria, pollen, VOCs, and tobacco odors are all captured through a series of industry proven filtration technologies. Housed in a 16-gauge Cold-Rolled steel cabinet, the CleanLeaf CL-3000-series is self-contained and does not require outside ventilation. **Each unit comes with factory-installed eyebolts on all 4-corners.**
