

# PR8.0 FLUSH MOUNT AIR CLEANER

Keep your environment smoke-free with the PR8.0 flush mount commercial cigarette smoke eliminator.

**400 – 800 CFM - 1 unit covers approximately 4,000 cubic feet. 3-filter system includes 6 inches of HEPA media plus pre-filtration & carbon.**

The PR8.0 Air Cleaner is designed to drop into a suspended ceiling. It replaces either (1) 2' x 4' tile or (2) 2' x 2' tiles. **13" of clearance above the drop ceiling is required.** It's recommended that the ceiling height does not exceed 8 - 9 feet. **The weight of the system does not rest on the ceiling grids but is secured above the suspended ceiling to a permanent structure such as a joist or beam.** All filters in the PR8.0 are accessible from the intake grill on the face of the system. **1 unit recommended for every 800 square feet.**

**How does the PR8.0 work?** Three (3) Filter System Provides Excellent Clean Air Results. The PR8.0 Air Cleaning System uses a powerful blower to draw the air from smoke-filled areas. As the air flows through the high-efficiency filter media, 95% of airborne particles & contaminants are removed on each pass. The clean air that is constantly discharged into the area is refreshing and remarkably free of smoke, odors and particles.
