

# FM-2000 FLUSH MOUNT AIR CLEANER

Keep your bar, VFW hall, hotel, truck stop, beauty salon, retail shop, bowling center, restaurant or lounge area smoke-free with our FM-2000 flush mount commercial HEPA filter smoke eater.

**1,200 – 2,000 CFM - 1 unit covers approximately 10,000 cubic feet. 3-filter system includes 12 inches of HEPA media plus pre-filtration & carbon.**

The FM-2000 Air Cleaner is designed to drop into a suspended ceiling. It replaces either (1) 2' x 4' tile or (2) 2' x 2' tiles. **18" of clearance above the drop ceiling is required.** It's recommended that the ceiling height does not exceed 12 feet. **The weight of the system does not rest on the ceiling grids but is secured above the suspended ceiling to a permanent structure such as a joist or beam.** All filters in the FM-2000 are accessible from the intake grill on the face of the system. **1 unit recommended for every 10,000 cubic feet.**

**How does the FM-2000 work?** Three (3) Filter System Provides Excellent Smoke Removal Results. The FM-2000 Air Cleaning System uses a powerful blower to draw the air from smoke-filled areas. As the air flows through the high-efficiency filter media, 95% of airborne particles & contaminants are removed on each pass. The clean air that is constantly discharged into the area is refreshing and remarkably free of smoke, odors and particles.
