Care guide

Chinese Evergreen
Aglaonema

When your plant arrives

Remove the plant from the box, water if the compost feels dry and place where it is to grow.

How to care for Aglaonema

Keep compost moist, although water sparingly March to November, and mist regularly. Feed from March to September and repot every three years. Cut off any leaves that go brown.

Where to place Aglaonema

Place in a conservatory or on a coffee table in good light or dappled shade, but not direct sunlight. Make sure the temperature does not fall below 16°C. Can be toxic to pets.

Possible problems and how to solve them

Shriveled leaves that can be caused by the air being too dry, a problem helped by misting. Curled brown edges can be caused by cooler temperatures or draughts. Watch for mealy bugs, which can be washed off.

General care advice

Wipe leaves to remove dust and mist regularly to maintain a tropical environment.
