Use a ruler on the guide below to ensure this page is to scale so you can find your accurate ring size.

If you have a ring that fits you well, lay it over the ring sizes below to find your size. Otherwise, use the ring sizer at the bottom of the page to find your ring size.

Cut out the ring sizer below by cutting along the edge of it and along the line next to the A to create a slit. Wrap the sizer comfortably around your finger how you would want your ring to fit then insert the B end through the slit by A. The number shown will be your ring size.
