

## MIST BOLLARD

The idea behind Mist is built on simplicity, with a simple conical screen. With an opal glass body, that is slightly longer than the screen, the light source is well protected and the light emitted from the lamp creates a striking spread of light for any driveway. Both the bollards and facade models are available in the following colours; graphite, rust and black structure. With an E27 socket, Mist is able to offer energy-efficient alternatives for flexible lighting based on temperature and strength. Design: Roger Persson
