

BELID

MOON WALL

Moon's glass body is inspired by older stable and industrial lamps and with its soft form, provides an expressive and exciting lighting experience. With integrated 6W LED technology and nearly 200 hours of burning time per kWh, Moon is an energy-efficient outdoor fixture. The LED technology sits on the flat top of the lamp, allowing the clear glass to beautifully reflect the light and contribute to Moon's clear and illuminating identity. Design: Roger Persson
